

Modular Approval Request FCC (KDB 996369 D01 & Part 15.212)

FCC ID: 2AL8M-1726A

<i>Items to be covered by Single modular transmitters.</i>	<i>Answer from applicant</i>
1. The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.	The module does not complies with this requirement.
2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	The module complies with this requirement
3. The module must contain power supply regulation on the module	The module complies with this requirement (fixed on-board voltage regulator)
4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b).	The module complies with this requirement (embedded PCB antenna)
5. The module must demonstrate compliance in a stand-alone configuration.	The module complies with this requirement
6. The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).	The module has a permanent label where the FCC ID will be placed.
7. The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.	The module complies with this requirement
8. The module must comply with RF exposure requirements.	The module complies with this requirement

Note: A limited modular approval (LMA) may be granted for *single* or *split* modular transmitters that comply partially with the requirements above.
