

CTRL-001A

Setup & Configuration

The Fidgetly CTRL 360° Mobile Gaming Controller requires x2 CR2032 batteries in order to function properly. To install the batteries, remove the rear cover of the product. This can be accomplished by

locating the snap at the top of one of the fingers as shown in “Figure A”. Gingerly apply parting pressure to this section and the

battery cover will separate from the product. Install the two CR2032 batteries included in the packaging (+) side

facing away from the product. Once installed the LEDs will illuminate as indicated in the table below “Figure B”.

Reinstall the battery cover in the reverse manor at which you removed the cover as this will make it easier to snap

together. To do this locate the snap once again and hook the battery cover over the two opposite fingers of the

snap then close the final snap. Now its time to connect and personalize your device.

Using your tablet or smart phone, download the Fidgetly App from either the Google Play store, or the Apple store. Once installed launch the app. The app should already begin searching for your Fidgetly CTRL, once

found you will be prompted to select the device which is yours and press next. This will sync your new device to

your smart phone or tablet. All that is left is to create a profile by following the steps within the app, and you are

ready to go! Congratulations you are now ready to compete against your friends and community, happy spinning!

Device enters sleep mode after a period of time when not in use to extend battery life. To wake up,

spin the device and it will awake after the third spin.

Figures

Figure A.

LED	Status	Description
Red/White/Blue	Circling	Device Paired Successfully
Blue	Slow Flash	Syncing with App
Red	Fast Flash	Replace Batteries

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

IC NOTICE TO CANADIAN USERS

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference, including interference that may cause undesired operation of the device. This device complies

with RSS-247 of Industry Canada. Operation is subject to the condition that this device does not cause harmful interference. This Class B digital apparatus complies with Canadian ICES-003 (Cet appareil numérique de la Classe B conforme à la norme NMB-003 du Canada).

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Cet équipement est conforme aux limites IC d'exposition aux radiations définies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec une distance minimale de 20 cm entre le radiateur et votre corps. Cet émetteur ne doit pas être situé ou opérant en conjonction avec une autre antenne ou émetteur.
