

Conducted Emissions - Front View

A black Raspberry Pi 4B is shown on a wooden board. It is connected to a power supply unit (PSU) and a cooling fan. The PSU is a black, rectangular unit with two USB-A ports and a USB-C port. The cooling fan is a small, black, square unit with a fan blade. The Raspberry Pi is connected to the PSU via a USB-C cable. The cooling fan is connected to the Raspberry Pi via a fan header cable. The entire setup is on a wooden board, which is placed on a metal surface.
