## 1.Power on and waiting for match

Push the power button to the location ON, then long press the power key (about 3 seconds), release after blue led lights and hearing the warning tone, which means opening finished; when the blue led flashes(the warning tone sounds twice) means waiting for paring.

1Power switch
2BT Switch
3Charging USB interface

2.How to pair successfully

Firstly, enter into the "Bluetooth" of setting, open and fresh it. You could find the Bluetooth name: yin yue zhen, click it to match. The blue led will light (the warning tone sounds once) while the position of Bluetooth symbol of mobile phone will show the speaker's battery level icon. The Apple IOS system could show it, while parts of Android system could show.

3.Play and pause

After paring successfully
1) Bluetooth module operation—short press the 'power on' button to play music, short press it again to stop the music, the volume is controlled by phone.
2) Phone operation—open the music player of phone, click the music you want to play, then it will play music. Click the "pause", then it will pause.

4.Dial and answer the incoming call
A. Dial

1) Bluetooth module operation—short press the 'power on' button twice (the interval is less than 1 second). The blue led lights means calling mode. Short press the button when finish the calling, redial the last phone number (the music will pause if you click the dial twice when playing the music, the music will resume play when calling finished), you could use the Bluetooth module to communicate after answering the incoming call.

2) Phone operation—Calling by phone when the music is playing the music will pause if you click the dial twice when playing the music, and the music will resume play when calling finished).

B. Incoming Call

1) Bluetooth module operation—A call incomes when the music is playing, the music will pause and the warning tone will sound once, while the ring tones will sound, (if you set the phone as vibrate, the phone will vibrate), short press could answer. After answering the incoming call, click this button again to hang up the call. (the music will pause if the call incomes when the music is playing, the music will resume play when calling finished).
2) Phone operation—The phone could answer the call directly, (the music will pause if you click the dial twice when playing the music, the music will resume play when calling finished). You could set the phone call way, operation method by phone in the process of calling, click

the Bluetooth symbol on the screen(there will be a bluetooth symbol when calling if the Bluetooth of speaker and the phone match successfully, there will be no symbol if failing to match, the position of Android and ISO system is different), select the appropriate option after popup dialoging, click the key with Bluetooth symbol ✳, it will show three selections.
1. Speaker (Hands Free) 2. Handset 3. Bluetooth (yin Yue zhen)
Select the Bluetooth (yin Yue zhen)is ok.

5. Social software warning tone

A. New message from WeChat, the warning tone will sound once when there is no condition of computer login (there will be no warning tone if you set the phone as vibrate), open the gif, video document, whose sound will play in the Bluetooth module.
B. New message from QQ, the warning tone will sound once when there is no condition of computer login (there will be no warning tone

if you set the phone as vibrate), open the gif, video document, whose sound will play in the Bluetooth module.

6. Charging

Connect the speaker with phone by USB charging cable (Input: 5V/1A), push the power button to the location ON. Red led lights means charging the speaker. The led indicator light turns off means the speaker is fully charged.

Notes:

1.The speaker will shut down automatically when the Bluetooth does not match for 10 minutes.
2.Restart the speaker, it will rematch with the phone which matched before automatically. If failing to match, fresh and rematch it.
3.When appearing the low battery clarm and sound pausing, charge in time.
4.System halted when it is not working, reslide the "power on" button.
