	Things to be done		Download is completed.
	Start alarm clock		General notice (such as synchronization error)
	Music is being played.		More
	Data is being synchronized.		Battery mark
	SD card space is insufficient.		Battery is being charged.
	WIFI service is connected and network is available.		Flying mode
	GPS positioning		Bluetooth is connected.
	3G service is being connected and data is being exchanged.		SIM card information, roam, and no signal
	Dial/receive		Reject the call

1.4 Key Functions

Descriptions on Key functions:

Power Source key	● Long press this key to start ● In start status, long press this key to pop up the Close option. ● In start status, press this key to close the screen.

	● In start status or when failure occurs to the machine, long press the Power Source key for 7 seconds to let your device enter the Close status.
Volume	● Press Volume+ to turn up the volume, Volume- to turn down the volume

1.5 Start screen in close status

If the screen is in close status, you can short press the power source key or long press the return key to start the screen. After the start, the screen enters lock status, use your finger to press and hold "Lock" icon and slide toward right to unlock the screen.
Figure 1-7

1.6 Use of Touch Screen

Operation modes in the Phone

There are multiple methods to view the home screen, menu and application programs on your Phone.

Choose by pointing

When you want to use screen keyboard to input information and choose items on the homepage interface such as application programs, you only need to point with your finger.

Press and hold

If you want to start the available option of a certain item (such as text box or link in the webpage), or move the shortcut and the main program menu on the homepage interface, you only need to press and hold this item.

Quick slide or slide

Quick slide or slide means using finger to make quick vertical or horizontal drag action in the picture.

Drag

Before beginning to drag, you must use your finger to press, hold, and apply certain pressure and do not loosen your finger before you drag the item to the position you desire.

Rotation

Regarding most pictures, you only need to rotate the Phone sidewise, and the screen can be automatically turned from horizontal to vertical direction, such as the cases when you input words and see a movie.

1.7 Homepage Interface

The main menu screen will display all the application programs on the native computer. You can use the application programs, shortcut and customize the wallpaper of your homepage interface.

Skill: In any application programs, it is possible to press the Homepage key to return to the homepage interface.

1.8 Conversation Function

Dial phone calls

You can dial a phone call through the dial application, or choose a number from contact person application for dialing. When you are in a conversation, you can click the key to use other functions. If you want to return to the phone call interface, slide the status column downward and click the current conversation.

※When dialing or receiving a phone call, do not contact or touch the receiver and the loudspeaker to avoid influencing the conversation quality.

Dial a phone call through dialing application.

1. On the main screen, click and choose the application program, and dial to open the phone call application.
2. Click the digit key to input the phone call number.
3. Click the dial icon to dial a number.

6
Figure 1-9

Dial a phone call through contact person.

1. On the main screen, click and choose the application program, and the dial to open the phone call application.

2. Click the contact person icon to the contact person tab, and click a contact person to dial a phone call.

Dial a phone call through conversation record

1. On the main screen, click and choose the application program, dial to open the phone call application, and switch to the conversation record tab.

2. Click the key on the right side of the conversation record to dial this number.

Receive or Reject a phone call

Receive a phone call

When there is an incoming phone call, drag the phone call icon toward the right to receive a phone call.

End a conversation.

In a conversation, click the Hook-on icon to end the conversation.

Reject an incoming call.

When there is an incoming phone call, drag the phone call icon toward the left to reject the phone call.

※ You can also drag it upward to the short message icon, reject the phone call and send a shor message to the caller.

1.9 Access Application Programs

How to access the application programs of the Phone:

1. Click the application program menu, as shown in Figure 1-10
2. Choose the application program to be accessed.
3. When wanting to exit from the program interface, press Return key to return to the preceding interface or press Homepage key to directly return to the homepage interface.

* Power :   Rechargeable Li-poly battery (3.8V, 3220 mAh).

          power Adapter(DC 5V,1.5A).

*   Playback About 7 hours for music. About 4 hours for video. About 4
Time(hours) :   hours for web browsing.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▸ -Reorient or relocate the receiving antenna.
- ▸ -Increase the separation between the equipment and receiver.
- ▸ -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ▸ -Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:
This Rokit Jupiter meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement
The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Rokit Jupiter (FCC ID: 2ALTHI04) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.245W/kg and when properly worn on the body is 0.792W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation
This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
