Press the lock switch, all door unlock at same time except rear door. The turning signal lamp will flash twice.

Unlock operation

Press this key to unlock

WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC ID: 2AM7K-AE120402

Open and close—Door

If the electronic smart key can not be operated within a normal distance, or if the indicator on the key is dim or off:

Please check whether there is interference from the near radio station or airport radio transmitter.

The battery in the electronic battery keys may be low power, please replace the original battery with the same specifications of the new battery.

2. Turn the mechanical key to open the electronic smart key cover .

3. Remove the battery .

Replace the key battery

step :

1. Pull down the release switch and remove the mechanical key .

4. Place the battery positive (+) face up in the box , put the cover back tightly, then put the mechanical key back into the smart key.

After replacing the battery, check whether the electric smart key is working properly. If the electronic smart key is not normal operating, please contact the Changjiang electric vehicle authorized service providers .

Open and close—Door

Note
<ul style="list-style-type: none">◆ Do not modify the battery cover to avoid any failure◆ Make sure that the positive and negative are installed correctly◆ Do not replace the battery with a wet hand, the water will cause rust◆ Do not touch or move any part of the electronic smart key, otherwise it will affect the correct operation.◆ When replacing an electronic smart key battery, note that the key must keep away from dusty or greasy.◆ Tightly cover the electronic smart key cover

If you lost the electronic smart key, please contact the Changjiang electric vehicle authorized service provider as soon as possible to avoid theft or accident happen.

Keyless entry and one button start function

Put the smart key in your pocket or bag and do not have to take out, Press **the micro switch** on the door handle to unlock or lock the door , Except the rear door, all doors will unlock or lock together. Start the vehicle by pressing the start button .

Enter function—Lock and lock the door.

Start function—The vehicle power is switched between OFF, ACC and ON.

- The detection distance of the vehicle to the smart key is about 1.5m .
- If the key is close to the outside detection antenna (door handle) within 10cm may not be detected normally.
- When the door and the window glass are closed, if place the key in the front of the drive seat or the instrument panel area. The system will not respond to the keyless entry request function, you can not unlock the door through the door handle button.
- All doors are equipped with keyless entry and the system only responds to the keyless entry function on the current side of key.
- In response to a micro-switch for 1 second does not respond to the second micro-switch action.
- In response to the keyless entry, the red indicator on the key will flash.

Open and close—Door

The keyless entry and commissioning system may not work properly in the following cases .

- When the key battery is low power. The combination dashboard will indicate low power on the key.
- When there is a facility to release strong electromagnetic waves nearby, such as TV towers, power stations, radio stations, Unicom signal towers, mobile towers .
- When the smart key is carried with a communication device, such as a two-way radio communication device or a mobile phone.
- When the smart key is in contact with or covered by a metal object.
- Quickly operate the door handle .
- The smart key is too close to the door handle.
- When someone else operates wireless remote control on a nearby car.
- Smart keys are in the vicinity of high-voltage equipment or noise-generating equipment .

If one button start system is faulty, start the vehicle, the red or green light on the button will continue to flash.

If the keyless entry and one button start function has system failure that can not run properly, please contact the Changjiang electric vehicle authorized service providers. Be sure to carry all the smart keys, which is necessary to repair this system.

Note
<p>◆ Do not arbitrarily change the transmission frequency, increase the transmission power(Including additional installation of the transmit frequency amplifier),Do not connect the antenna or switch to other transmit antennas</p>

Open and close—Door

Emergency start function

When the smart key low power or space environment meet electromagnetic interference, the normal keyless start operation may not detect the smart key.

In this case the system can be integrated in the start button reader to find the smart key.

Place the smart key on the back or front with the start button parallel to less than 2CM, depress the brake pedal, the start button green light on, then move the smart key, press the start button, the vehicle starts .

Saving smart key battery power

If the smart key to receive long-term strong electromagnetic waves, the battery power will be quickly depleted. The smart key must be keep 1 meter away the following equipment.

- TV
- personal computer
- Wireless telephone charger
- Lighthouse
- Fluorescent lamp

Steering wheel lock function

Intelligent Terminal Usage Information—Introduction to Intelligent Terminals

Intelligent terminal (10.4 inch touch screen)

Instructions for use

1. During driving, the driver should not watch films and televisions, operating the system is strictly prohibited, this is to guarantee the traffic safety and avoid the distraction from driving. If the above can not be complied, the Company will not be held responsible for all the consequences arising therefrom.
2. When driving on the rugged road, the violent bumps may lead to sound jump phenomenon.
3. The volume should be kept to an appropriate level while driving, so as to be able to feel the road and vehicle conditions and to ensure safe driving.
4. Keep this product away from moisture and dust. Do not expose this product to water, which can cause electric shock, fire or other damage.
5. If the ambient temperature is too high or too low, this will adversely affect the normal function of this product. If the vehicle is not activated, or it is exposed under the sunlight for too long or is kept in a cold place where the temperature is too low, the intelligent terminal may work abnormally. Once the temperature inside the car comes back to the normal range, intelligent terminal will restore to the normal function. If it can not be restored, please contact the local Changjiang electric vehicle authorized service providers for maintenance.
6. If the intelligent terminal system fails in power supply, or no image, or no sound, or it is in an abnormal condition such as unknown objects inside, water, smoke, or bad smell,

Please make sure not to open or disassemble the product, and immediately contact the local Changjiang electric vehicle authorized service providers.

7. To avoid the damage to the touch screen, be sure to use your finger (special calibration can use the stylus) to touch the screen. Do not drag or press the screen hard, otherwise it may cause scratches or damage.
8. Keep the touch screen away from direct sunlight, if not, the touch screen will not work normally because of high temperature.
9. To clean the dust on the touch screen, please first press the start engine key to switch vehicle power to the OFF, and then use a soft dry cloth to wipe. Wipe the touch screen carefully, do not scratch the surface. Do not use irritating or abrasive chemical cleaners.
10. Please firmly fix the USB, AUX and other audio and video equipment while driving, do not let them dropped in the vehicle so as to prevent them from slipping to the brake pedal or accelerator pedal and cause trouble to traffic safety.
11. Intelligent terminal bears 3G network and phone call functions, and for the knowledge of the specific fares, please consult China Unicom customer service. And in case of other problems, please contact the Hangzhou Changjiang electric vehicle authorized service providers.
