

Regulatory agency identifications

1.- FCC Regulations:

This watch complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This watch has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

2.- RF Exposure Information (SAR)

This watch meets the government's requirements for exposure to radio waves. This watch is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. The exposure standard for wireless mobile devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the watch transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the watch while operating can be well below the maximum value.

This is because the watch is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

The highest SAR value for the ChronoVolt CV16 as reported to the FCC when tested for us on the wrist, as described in this user guide, is **1.22 W/kg (1g)** (Body-worn measurements differ among cellular device models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various cellular devices, and at various positions, they all meet the government requirement. It is advisable to maintain a spacing of 30 inches (76cm) from the mouth to the watch for the microphone to work ideally. The face to device distance of less than 6 inches (15cm) is not optimal. SAR is measured at 10mm from mouth to watch distance.

The FCC has granted an Equipment Authorization for this watch with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this watch is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on **FCC ID: 2AM9L-CV16**.

3.- Hearing aid compatibility (HAC) for wireless telecommunications devices:

The ChronoVolt CV16 is not hearing aid compatible.

NEED SOME HELP?

Feel free to visit us at www.schokgear.com or www.chronovolt.com where you can find answers to your questions as well as to read our FAQs, features of this and other products, and register to download free wallpapers, ringtones, and much more.
