Subject: Reuse of test results for the CTPDIN due to integration of an already certified module

Dear Sirs,

CTPDIN integrates an already certified module LISA-U201 with GSM/UMTS.

To show compliance for the GSM/UMTS portion, following steps have been made:

1. Verification of the conducted output power to the already certified module listed to reuse the test reports
2. Measurement of the radiated emissions from the host due to:
 - a) Module integration in the final device
 - b) Different antenna trace design
 - c) Different antenna use.

The reused measurement results in this filing refer to the following module certification under the certification numbers:

FCC ID XPYLISAU201

IC 8595A-LISAU201

with reference to the following test reports:

- MDE_UBLOX_1519_FCCA, August 25, 2015, from 7Layers
- 6-0082-11-1-2a, November 23, 2011, from CETECOM
- 6-0082-11-1-2b, November 27, 2011, from CETECOM

If you have any questions, please feel free to contact me.

Yours sincerely,

B. Sc. Uwe DOLLITZ
