Subject: Reuse of test results for the CTPMID due to integration of an already certified module

Dear Sirs,

an already certified module LISA-U201 with GSM/UMTS is integrated in CTPMID according to KDB 996369.

To show compliance for the GSM/UMTS portion, following steps have been made:

1. Verification of the conducted output power to the already certified module listed to reuse the test reports
(The used settings of the integrated module are the same as used for module certification)
2. Measurement of the radiated emissions from the host due to:
 - a) Module integration in the final device
 - b) Different antenna trace design
 - c) Different antenna use.

The reused measurement results in this filing refer to the following module certification under the certification numbers:

FCC ID XPYLISAU201
IC 8595A-LISAU201

with reference to the following test reports:

- MDE_UBLOX_1519_FCCa, August 25, 2015, from 7Layers
- 6-0082-11-1-2a, November 23, 2011, from CETECOM
- 6-0082-11-1-2b, November 27, 2011, from CETECOM

Daimler takes full responsibility that the test data as referenced above represents compliance for the new FCC ID.

If you have any questions, please feel free to contact me.

Yours sincerely,

B. Sc. Uwe DOLLITZ
