Attention: Application Examiner / Review Engineer

Subject: Request for a Class II Permissive Change

FCC ID: 2AMIOCTP4465960
Grant Date(s): 2019-12-09

Pursuant to CFR47 §2.1043, the Grantee hereby requests a Class II Permissive Change for the above identified device.

Following changes apply to the modified device:

- HW Change: NAND flash Macronix MX60LF8G18AC-XKS (indicated as D5800 within Schematics/PartsList) is replaced by Cypress S34ML08G201BHA003. Both ICs have similar specifications and identical footprint and are interchanged without any PCB layout or additional HW adaptations.
- HW Change: The integrated WWAN Module has been modified by the original grantee via Class II Permissive Change. The changes are described in detail in the submitted delta description..Due to the fact that this FCC certification covers the entire endproduct, spot checks are performed based on the evaluation of the C2P Test Report of the WWAN Module to show further compliance with the FCC requirements.

There are no further changes made to the original product. The above listed changes result in the similar RF characteristics as in the original filing - therefore the not repeated test results continue to be representative of and applicable also to this modified device.

Sincerely,

Signatory
