

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device. On the left is a green printed circuit board (PCB) populated with various electronic components, including a large silver heat sink, a black integrated circuit, and several smaller components. A black cable is connected to the top of the board. To the right of the PCB is a black plastic housing with a clear rectangular window. Both components are placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the components, showing measurements in millimeters and centimeters.
Solder Board-Component View 1	 A photograph showing a close-up of a green PCB with various components. A large silver heat sink is prominent in the center. To the left of the heat sink is a black integrated circuit. Several colored wires (yellow, red, blue) are connected to the top of the board. The PCB is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters and centimeters.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) labeled 'VT81-MB-V2.2' and '5120'. The board is positioned vertically against a blue background with a black ruler on the left side showing measurements from 0 to 100 mm. A large, square, gold-colored component is mounted on the board, with the label 'GUHSGPJ0' visible. Various other electronic components, including resistors and capacitors, are visible on the board.
Solder Board-Component View 3	 A photograph of the same green PCB labeled 'VT81-MB-V2.2' and '5120', showing a different component view. The board is positioned vertically against a blue background with a black ruler on the left side showing measurements from 0 to 100 mm. A large, rectangular, silver-colored component is mounted on the board. A yellow component is also visible. Various other electronic components are visible on the board.

Solder Board-Component View 4	 A photograph showing the solder side of a green printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a label 'VT81-MB-V2.2' and '5120' printed on it. Several colored wires (red, yellow, blue, black) are connected to the top of the board.
Antenna View	 A photograph showing the antenna side of the green PCB. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a label 'VT81-MB-V2.2' and '5120' printed on it. A red box highlights a specific area on the board, which is labeled 'GSM/LTE Ant.' with a red arrow pointing to it. Several colored wires (red, yellow, blue, black) are connected to the top of the board.
