3.Replacement of batteries

When you need to replace the battery, follow these steps.
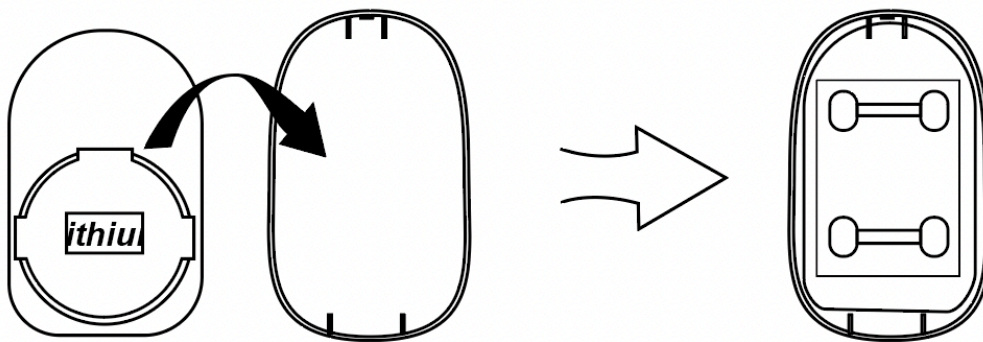

● Find a small notch on the back of the unit near the lifting ring and pry open the back case wi th a small one–piece screwdriver.
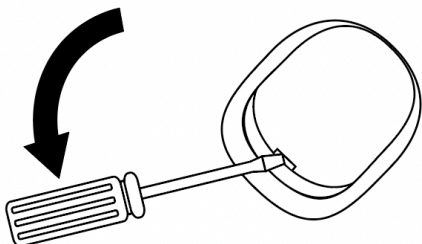

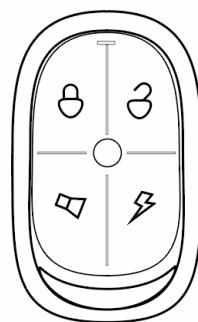

- Remove the old batteries and install new batteries. (Notet: Only Lithium batteries of CR2032 size can be used)

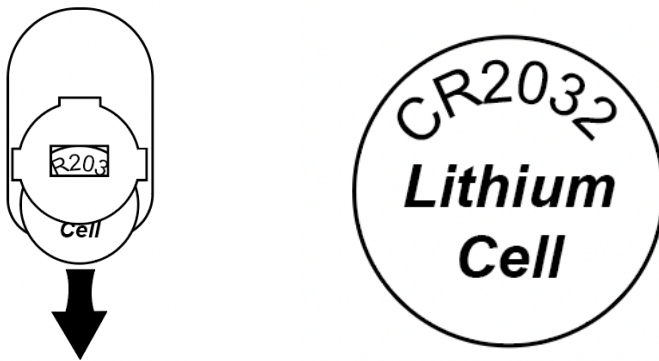

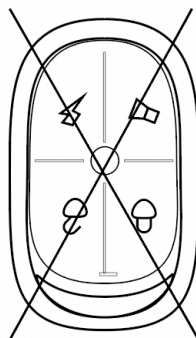

- Put it back on the back cover, taking care that the battery faces down and the buttons face up. Then close back into the housing.

- If it doesn't fit well, check is the buttons are upside down.
