

WiFi 6GHz Attestation Letter

Date: April 18, 2025

FCC ID: 2AMNG-TG310

IC: 23177-TG310

We, Toast, Incorporated, attest that this device complies with device protocol requirements and operational restrictions: for indoor client 6XD.

- ※ Statement that the device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- ※ Statement that this device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that they will not continually repeat the request if they do not receive a response from an AP.
- ※ Statement that transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

Sincerely,

Signature
