

User Manual

1. Pull the phone clip away from the pole and place the phone security in between the phone clip.

2. To power on, long press  the on-off/shutter button for 4 seconds until the indication light flashes.

3. Search, connect & pair your cellphone with "MyPole" in your phone settings. Then, long press the up/down button on the selfie stick to adjust the length freely.

4. Once connected to bluetooth, open  the camera on your phone and press the on-off/shutter button to take photos.

- a) The selfie stick will continue extend until you release the button. It will reach maximum length by automatically by pressing the  key twice.

- b) The selfie stick will retract by long pressing the  key, until you release the button. The selfie stick will retract completely by pressing the  key twice.

5. Power off the stick by long pressing  the on-off/shutter button. If the selfie stick has not been retracted the indicator light will flash until it is completed. Then you are able to power off.

6. When the battery is low the red light will flash. Please charge as soon as possible. When the power is too low for the selfie stick to work, the connection between the phone and the stick will disconnect and the stick will retract and power off.

7. The red lights will appear as you charge the battery. They will turn off when the battery is fully charged.

Product Name	Auto-extension Selfie stick
Model Number	MP01
Batteries	350mAh
Product Weight	230 g
Standby	72 Hours
Supply Voltage	5V
Charging	1.5 Hours
Working Frequencies	2.4GHz
Material	Non-slip Silicon+Alluminum

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
