

PUP-0497-3FT-CC-WHT MagStack Duo User Manual

1. Product Overview

The MagStack Duo is an all-in-one charging solution that combines our patented magnetic cable technology with an integrated wireless charger, designed specifically for Apple users. It is compatible with Apple Watch, AirPods, iPhone 15 and later, as well as other USB-C-enabled devices—ideal for fast, convenient charging at home or on the go. Crafted with premium aluminum and equipped with self-coiling magnetic cables, MagStack Duo ensures a tidy, organized look when not in use. With a built-in Apple Watch wireless charger and dual USB-C ends, it supports versatile charging setups in a sleek, travel-friendly form.

2. Key Features

- Wide Compatibility:** Works with Apple Watch, AirPods, iPhone 15 and newer, and other USB-C devices.
- Fast Charging:** USB-C cable supports up to 60W fast charging. Apple Watch wireless charger supports up to 5W for Series 7 and later.
- Magnetic Cable Management:** Magnetic cable design keeps everything neatly coiled and tangle-free.
- Premium Materials:** Durable aluminum housing paired with strong magnetic cables for long-term use.
- Travel-Friendly Design:** Compact and lightweight, easily fits in your bag or carry-on for daily or travel use.

3. Technical Specifications	
Item	Specification
Input Interface	USB-C (dual-end)
Wired Output Power	Up to 60W (depends on power adapter used)
Wireless Output Power	Up to 5W (Apple Watch Series 7 and later)
	Up to 2.5W for earlier Apple Watch models
Supported Devices	iPhone 15 and newer, Apple Watch, AirPods with wireless charging case, USB-C devices

Material	Aluminum alloy + magnetic cable
----------	---------------------------------

4. How to Use *(Suggested Section - You may expand)*

Connect the USB-C cable to a suitable power adapter (PD 60W or higher recommended).

Plug your iPhone or other USB-C device into the other USB-C end.

Place your Apple Watch centered on the wireless charging pad. Charging begins when the indicator lights up.

After use, the magnetic cable coils itself neatly for storage.

5. Safety Instructions *(Suggested Section - Expand as needed)*

Always use certified or original power adapters to ensure safe charging.

Do not use the device in wet or high-temperature environments.

The product is not waterproof—avoid contact with liquids.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
