

# PUP-0496-WHT-3FT MagStack Apple Watch Charger User Manual

## Product Features

Tangle-Free Magnetic Design: Patented MagStack™ technology keeps the cable neat and organized — no more messy knots or tangled wires.

Fast Charging:

Apple Watch Series 7 and later: Up to 5W fast-charging.

Apple Watch Series 6 and earlier: Up to 2.5W maximum charging rate.

## Premium Build:

Durable nylon braided cable

Aluminum alloy housing for long-lasting performance

Travel-Friendly: Compact and stays coiled — perfect for your desk, laptop bag, or luggage.

## How to Use

Plug the USB-C end into a compatible power adapter or port.

Align the back of your Apple Watch with the charging pad.

Charging will begin automatically when correctly placed.

## Compatibility

- ✓ Apple Watch Series 1 - 9
- ✓ Apple Watch SE
- ✓ Apple Watch Ultra

## Care Tips

Avoid pulling or twisting the cable forcefully.

Store in a dry environment.

Clean gently with a soft cloth if needed.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
