

## Smart Life

### WIFI Smart Socket User Manual

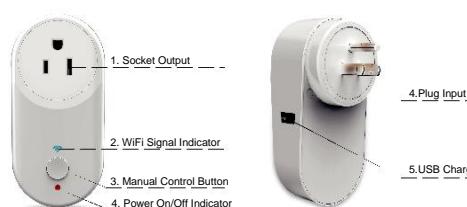

WiFi smart socket, able to connect internet through WiFi connection, is remotely controllable to switch on/off electrical devices which are plugged into the sockets. You can use the *Smart Life* app in your smart phone to control the socket from anywhere when your smart phone is on internet. The smart WiFi socket can be used to power any electrical devices, such as fans, lights, water heaters, fountain, etc. The socket has timer function, countdown function, and USB charger on/off control.

Note:

- 1.This user manual is suitable for socket of BS, UL, SAA, and VDE standard.
2. Works with Alexa.

#### Indicator:

01

#### Package Includes:

WiFi Smart Socket x 1  
WiFi Smart Socket User Manual x 1

#### Operation

##### 1.Download APP ( Two Ways to Get the APP )

A . Scan QR-code on the package.

B . Search *Smart Life* in Google Play ( for android smart phone ) ; Search *Smart Life* in APP Store ( for iPhone ).

Android APP

iOS APP

##### 2.Register and Sign in APP

A . Run the APP.  
B . Login with your account & password. Please register a new account if you don't have.

##### 3.Configuration ( Two Ways To Configure )

Plug your WiFi socket into a wall outlet and press on/off button with different way to enter default configuration mode or AP configuration mode. The indicator LED flashes quickly in default mode but slowly in AP mode.

02

#### A.EZ Mode (Default Mode)

Tab the *Add Devices* at the right corner, select device type *Electrical outlet*, Tab *Confirm indicator rapidly blink*, search WiFi hotspot and type password of the hotspot. Device is connecting.

After connected, the LED turns on constantly, press the button on the main screen of Smart Life app in your smart phone to switch on/off power outlet, the power LED indicator turns on when socket is on or off when socket is off.

#### B. AP Mode

Tab the *Add Devices* at the right corner, select device type *Electrical outlet*. Select *AP Mode*, tab *Confirm indicator slowly blink*, search WiFi hotspot and type passwords of the hotspot. Then, open WiFi settings and connect to hotspot Smartlife-xxxx. Device is connected.

#### 5.Countdown Function

Click *Countdown* and set countdown function.

#### 6.Modify Device Name & Firmware Update

Click devices list and you will see *Info* at upper right corner, click *Modify Device Name* of your device. Click *Check for Firmware Update* to update the latest version.

#### 7.Remove Device

Click devices list and you will see *Info* at upper right corner, click to delete your device.

#### 8.Share Devices

Click *Device Sharing* button in profile, tab *Add Sharing* and enter the phone number you want to share.

#### 9.Device Reset

If you need to reset the socket, unplug it from the mains first. Then plug it in again and hold the button more than 5 seconds (less than 10 seconds) until the LED indicator starts flashing quickly.

03

#### 10.Manual Control

Plug your WiFi socket into a outlet, press the button manually to switch on/off the power for your appliances. Red LED off indicates off state, Red LED on indicates on state.

#### Warning

1. To prevent injury, this apparatus must be securely attached to the wall socket in accordance with the installation instructions.

2. WiFi Socket shall remain operational after installation.

3. The WiFi Socket may not work if there is a radio frequency interference in the operation .

4. You may be required to reset the WiFi Socket when radio interference occurs.

5. Indoor use only

6. Keep it in dry and it is not allowed to use in bathroom and other damp locations.

7. Please use it safely. It is not allowed to power appliances over the rated power.

#### Quick Guide of Using Amazon Echo to Control Smart Devices

##### 1.What you need to get started

Before using Echo to control your smart devices, make sure you meet the following conditions.

- Stable Wi-Fi network which could access to Amazon server. (For mainland China users)
- An Echo device, including Echo, Echo Tap, or Echo Dot.
- An Amazon account. (If you don't have one, Please register first).
- Smart Life app and a related account.
- Make sure there's at least one device under your Smart Life account, and the device's name could be easily recognized by Echo.

##### 2. Add devices in Smart Life app (Refer to App Instruction)

You can skip this part if you've already add some devices to your Smart Life account, and in the meantime the devices' name are easily recognized.

###### 2.1 Download Smart Life app (Refer to App Instruction)

You can scan the QR code below to download the Smart Life app:

You can also search "Smart Life" in either App Store or Google Play to install the app.

2.2 Register a Smart life account and sign in the app (Refer to App Instruction)  
Open the Smart Life app, tap "Register" to register an account, then sign in the app.

04

##### 2.3 Add device and change device's name (Refer to App Instruction)

Sign in with the Smart Life account, add the device, then change device name to a easily recognized word or phrase, like "bedroom light".

##### 3. Set up Amazon Echo and enable Smart Life Skill

We suggest using web for configuration in mainland China since Alexa app is not available here.

User can configure Echo through web or Alexa app.

Web configuration link: <http://alexa.amazon.com/spa/index.html>

##### Download Alexa app:

Scan to Download iOS App

Scan to Download Android App

We take app configuration as an example. Configuration through web and app are basically the same.

##### 3.1 Set up Echo with Alexa app

You can skip this part if your Echo is already set up.

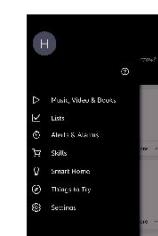

1. Make sure your Echo device is energized.
2. Make sure there's a stable Wi-Fi network which could access to Amazon server.

06

##### 3.Open the Alexa app by tapping the app icon on your mobile device.

4.Type in your Amazon account and password, then tap "SIGN IN".

5.Tap the hamburger menu on the top left corner, select "Settings", then tap "SET UP A NEW DEVICE".

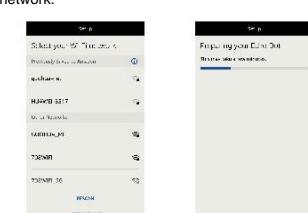

6. Select your Echo model, choose a proper language then tap "CONNECT TO WI-FI".

##### 7.Long press the dot button on the top of your Echo device until the orange light shows up, then tap "CONTINUE". When your phone is connected to Echo, tap "CONTINUE".

8.Select a Wi-Fi to let Echo have the access to the internet. Type in the Wi-Fi password, then tap "CONNECT". Echo may take several minutes to connect the network.

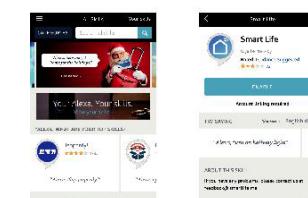

9. Tap "CONTINUE" when Echo is connected to the network. After an introduction video, tap "CONTINUE" to finish the setup.

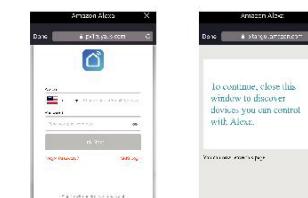

##### 3.2 Link Smart Life account to Echo

- 1.Tap "Skills" in the hamburger menu, then search "Smart Life". Select "Smart Life" and tap "ENABLE" to enable the Skill.

2. You will be redirected to the account link page. Type in your Smart Life account and password, don't forget to select the country/region where your account belongs to. Then tap "Link Now" to link your Smart Life account. The country/region, the account, and the password must match with the exact content in Step 2.2 when you registered the account. When "Alexa has been successfully linked with Smart Life" shows up, tap on the top left corner.

##### 4.Control your smart devices through Echo

###### 4.1 Discover devices

Echo needs to discover your smart devices before it controls them. You can say "Alexa, discover devices" to Echo. Echo will discover devices which have already been added in the Smart Life app.

You can also tap "DISCOVER" to discover the smart devices. Discovered devices will be shown in the list.

Note: every time you change the device's name on Smart Life app, Echo must re-discover before you control them.

###### 4.2 Control devices by voice commands

Now you can control your smart devices through Echo. You can use the following commands to control your devices (e.g., bedroom light):

- Alexa, turn on/off bedroom light
- Alexa, set bedroom light to 50 percent.
- Alexa, brighten/dim bedroom light.

You can also set up groups in Alexa app. Tap "CREATE GROUP", give your group a name like "my smart lights", select devices to add them in this group, then tap "SAVE".

Now you can control your devices by group. Try saying "Alexa, turn on my smart lights", all the lights strips are turned on!
