 Intended for indoor / outdoor use

## RECOMMENDED LIGHT STREAM™ LAYOUT

### IPHONE

Use your iPhone to set up the controller settings.

### CONTROLLER

The controller streams your desired settings wirelessly to each bulb directly.

### SWITCH

Place the switch at the beginning of each line to receive on / off power signals from the controller.

### LIGHT STREAM™ BULBS

Pairs with the controller to wirelessly receive commands for infinite color possibilities.

## CONTROLLER USER GUIDE - V-20587

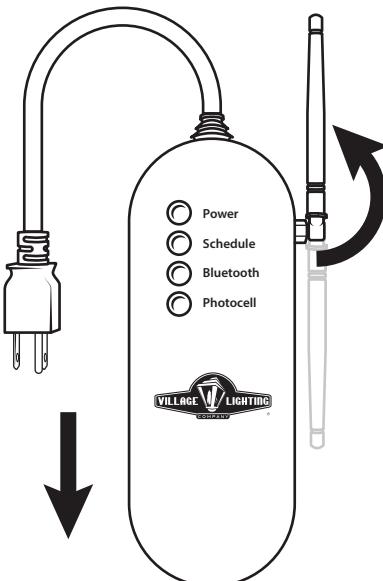

### CONTROLLER BASIC CONTROLS

**POWER:** When the light is on, this indicates the unit is plugged into power source.

**SCHEDULE:** When the light is on, this indicates unit is following a saved schedule that has been programmed.

**BLUETOOTH:** When the light is on, this indicates unit is connected to your iPhone via bluetooth.

**PHOTOCELL:** This is the photocell sensor, **DO NOT** block or cover from sunlight as this may decrease the effectiveness of the photocell feature.

### IMPORTANT!

Hang with the antenna facing upward and the sockets facing downward.

### SETUP / USAGE DIRECTIONS

1. Download the Village Lighting Light Stream™ app from the iTunes store.
2. Connect the Light Stream™ Controller to a power supply.
3. Open the application on your iPhone and scan the QR code on the back of your controller to connect.
4. Follow the tutorial / directions to continue setup of any needed bulbs and switches to work with the Light Stream™ controller.

## SWITCH USER GUIDE - V-20588

1. While using the Village Lighting app ( after connecting to your controller ) follow the steps outlined in the app to connect and pair your wireless Light Stream™ switch to your controller.

2. Repeat these steps as necessary for any additional switches you may need.

### IMPORTANT!

Female socket should be facing downward for outside use.

## **FCC Warning:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
