

1D Barcode Scanner

Model No.: CT007X

It integrates high-performance processor and decoding board, it has fast decoding, high-precision reading ability, and high anti-interference ability. It can easily read barcodes on paper, goods and other media. The scanning distance is a great improvement compared with similar products. It also boosts high scanning speed and powerful reading ability with high accuracy.

Appearance:

- 2.4G Wireless Mode
- USB Wired Mode
- ★ Rich variety of decoding
- ★ Design of whole body anti-vibration and anti fall
- ★ Independent intellectual property rights
- ★ Extremely comfortable handle feel
- ★ Button life up to 3million times
- ★ Long working time with large capacity lithium battery
- ★ 1800mAh large capacity lithium battery
- ★ Deep sleep technology, no need power on, press scan button can start scanning

Note: Read ‘Enter Setup’ barcode, then ‘Function setup’ barcode, and close with ‘Exit with Save’ to finish functions setup.

Functions Setup:

2.4G Barcode Scanner can setup all default functions through reading the setup barcodes.

LED Indicators

Indicator Colour	Meaning
Blue LED on and off quickly	Good read, with one short beep (high tone)
Yellow LED flashing (on/off ratio 1:1)	Indicates the 2.4G scanner is in setting mode
Red LED	The red LED is charging indicator, it will light during charging and off when full charged

Beeper

Beeping	Meaning
One long beep, high tone	Power on
One short beep, high tone	Read barcode
One long beep, low tone	Configuration error or the buffer is full
Two short beeps, high tone	Power off
Three short beeps, tone descending from high to low	Enter or Exit Setting mode
Three short beeps, tone ascending from low to high	Configuration correct

When you press the SCAN button, if the scanner has two short beeps (high tone) and stop scanning, it means the battery is dying.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
