

A black and white line drawing of a computer keyboard and a mouse. The keyboard is on the left, featuring a standard QWERTY layout with numerous circular keys. Above the keyboard is a horizontal rectangular display or status bar. To the right of the keyboard is a computer mouse with a scroll wheel and two main buttons.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Keyboard	
Product Size	430.9 x 146.9 x 34.27 mm
Product Weight	520g
Connectivity	2.4G Wireless connection
Power	1 AAA Battery
Voltage	1.5V
Connection Distance	8-10M
Power Saving	Enter sleep mode after 10min without action
Working Distance	Within 10 meters
Key Life	10 Millions Strokes

Mouse DPI	800-1200-1600
Power	1 AA Battery
Connection Distance	8-10M
Power Saving	Enter sleep mode after 10min without action

A diagram illustrating the connection of a USB drive to a laptop. A circular inset at the top shows a USB drive with the text "USB" and the USB symbol. A line connects this inset to a circular inset at the bottom left, which shows the USB drive being inserted into the USB port of a laptop. The laptop is shown from a side-front perspective, with the keyboard and screen visible.

power switch.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
