Pairing your device with Monopod iOS system: Open "Settings" then open "Bluetooth", your device will automatically search for pairing; turn on the Monopod, you will find "Shutter", click to connect your device and Monopod. After successfully setting up the connection, you can then open your camera to take great pictures and videos!</p> <p>Android system: Open "Settings" then open "Bluetooth", then click "Scanning", your device will start searching for pairing; turn on the Monopod, After successfully setting up the connection, you can then open your camera to take great pictures and videos!</p> <p>Note: The pairing is in progress when the blue LED light on the bottom of the selfie stick handle is flashing in middle speed. You may need to restart the monopod if failed to set up the connection at the first time. Just follow the pairing process one more time.</p> <p style="text-align: right;">• 1 •</p>
--	---	--

<p>Some Android system devices might not work with the monopod properly. You can try switching monopod system (Read further instruction below, or you can download "Camera 360° APP" and try again")</p> <p>2. How to switch the system</p> <p>Push the "Press" button and turn on the power of the monopod at the same time. And pair it with your device.</p> <p>Caution and safety</p> <p>1. Please read the instruction carefully before usage; 2. Other Bluetooth devices may generate signal interference; 3. It may cause conflict when using other Bluetooth devices with the monopod at the same time. Please try to use either at one time. 4. Do not try dismantling the monopod yourself; 5. Do not use corrosive solvent to clean the monopod; 6. Do not use the monopod or charge it when the environment is hot and directly in strong light; 7. Do not use the monopod when it is wet; 8. Do not throw the monopod into the fire; 9. Do not try to destroy the monopod with violence;</p>	<p>Remarks</p> <p>1. The LED light will light up and stay on for about 3 seconds then go off for 3 seconds. At the end it will start flashing; 2. When the LED light is off, either the switch is not turned on or the battery is out of power; 3. When the LED light is flashing in middle speed, it is in the process of pairing; 4. After successfully paired with your device, the LED light will flash very quickly for about 10 seconds and then goes off; 5. The LED light will flash once along with each press; 6. When the LED light is flashing in slow speed, you will need to charge the monopod; 7. The LED light is in red color when charging and the light will go off when it is fully charged</p> <p>This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful</p>	<p>interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.</p> <p>Caution: Any changes or modifications to this device not explicitly approved by the manufacturer could void your authority to operate this equipment.</p> <p>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>The device has been evaluated to meet general RF exposure exposure requirement. The device can be used in portable exposure condition without restriction.</p> <p style="text-align: right;">• 4 •</p>
