This manual contains important instructions for the safe operation of this electrical product

CAUTION

Caution hot on the PCB board

CAUTION

ELECTRICAL PRODUCT Keep away from children. Not recommended for children under 3 years of age. As with all electrical products, all precautions must be observed during use to prevent electric shock. If the power cord is damaged, it must be replaced by the manufacturer, its service agent or persons properly trained to avoid danger.

CAUTION

Stroboscopic lights can cause seizures in the people who suffer from photosensitive epilepsy.

IMPORTANT SAFETY INSTRUCTIONS WHEN ELECTRICAL PRODUCTS ARE USED, BASIC PRECAUTIONS SHOULD ALWAYS BE FOLLOWED, INCLUDING THE FOLLOWING: READ AND FOLLOW ALL SAFETY INSTRUCTIONS

1. Do not use the exterior sanding products unless they are marked for use inside and outside. When the products are used in outdoor installations, connect them to a receptacle protected by a safety circuit (GFCI). If one does not exist, contact a qualified electrician to do the installation.
2. This own product is not to install to the station permanently.
3. Do not mount or place near gas or electric heaters, open flames, candles or other similar color sources.
4. Do not attach cables to Product with staples or nails, or place them on sharp hooks or nails.
5. Do not let the lamps rest on the power cord or other wires.
6. Disconnect the product if you leave the house, when you go to sleep or if you are going to be unattended.
7. To prevent fire, burns, personal injury and electrocution, do not play with it or be placed where small children can reach it.
8. Do not use this product for an unspecified purpose.
9. Do not hang decorations or other cord objects, wire or light section.
10. Do not close doors or windows on the exportation product cables because that can damage your insulation.
11. Do not cover the product with cloth, paper or any other material that is not insulated for use with the product.
12. This product uses overcharging protection (fuse). An open fuse indicates an overload situation or a short circuit. If the fuse opens, unplug the product from the outlet. Also disconnect any other lighting fixtures or other products connected to it. Replace the fuse in accordance with the instructions to the user (observe what is written on the product to use the correct fuse) and check the product. If the replacement fuse is opened, there may be a short circuit and the product should be discarded.
13. Read and follow all instructions written on the product or provided with the product.

CAUTION

To reduce the risk of fire and electric shock:

1. Do not install on trees.
2. Do not suspend it from supporting strings in a manner that may cut or damage the insulation of the wires.
3. Do not remove the light rope from the product and hang it on trees or other places for decoration

INSTRUCTIONS FOR USE AND CARE

1. Before use, whether new or not, carefully inspect the product. Discard any product that has an electrical cord or insulation cut, damaged or rolled, cracks in the bases of light bulbs or other components, loose connections or exposed copper wires.
2. When storing the product, carefully remove it from the place where it is covered, to avoid any force or tension on the electrical connectors, connections and wires.
3. When not in use, store it carefully in a cool, dry place protected from sunlight.

CAUTION

To reduce the risk of fire or electric shock, do not attempt to replace the lamps or modify the chain.

FOR INTERNAL AND EXTERNAL USE

WARNING

"This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation."

"Caution: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment."

"NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help."
