Figure 4-2

5. Troubleshooting

5.1. Slow initial boot for tablet

After system upgrade of tablet, initial boot needs installation of the pre-installed software applications, and for about 2-3 minutes, it runs faster.

5.2. Tablet can not connect to WIFI

Ensure that the wireless router providing the network services works properly.

Ensure the tablet and the wireless router are kept with certain distance, and between which no wall or other obstacles exist.

Ensure the user name and the password are correct

5.3. Feeling hot of tablet

When multiple applications are running at the same time, or the screen is adjusted to the brightest, or it is recharging, this situation is normal.

5.4. System is disordered and does not work properly

Installation of some third-party applications may lead to system failure, and you can press the reset button to reset the system.

5.5. Unable to create e-mail or register applications

Ensure your network is properly connected to the Internet.

Ensure your email settings are correct.

Ensure your system time and the local time are consistent.

FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This mobile phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Portable Equipment (FCC ID: 2AMY3-8T9-422L) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the head is 0.746 W/kg and when properly worn on the body& worn is 0.696W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that does not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
