### Inquiry Details on 06/04/2018:

First category: RF Exposure \*  
Second category: SAR (RF Exposure)  
Third category:  
Subject: 3D camera  
Inquiry: Dear Sir or Madam,

Recently, I receive a 3D camera device, this device supports WiFi 802.11a/b/g/n technology.

For the SAR testing, I plan to measure five position?front side, back side, left side, right side, top side? which the device directly touch the pahntom, 0mm should be used for this project.

Please kindly confirm whether this test procedure is accepted for this project.

Thank you very much.

---

FCC Response on 06/05/2018:

Is there a viewfinder on the camera? If so you may have to take into account the face exposure condition. If not, and there is only potential for hand or body exposure, the testing configurations you have proposed are acceptable.

---Reply from Customer on 06/07/2018---

Dear Sir or Madam,

This device doesn't have a viewfinder, thank you very much.
