WARNING

- Do not disassemble the item.
- Damaged batteries can cause chemical burns when in contact with skin.
- Never throw the item or parts of it into the fire.
- Never expose the item to extreme temperature changes, humidity or liquids.
- Do not use if the items or parts of it are damaged.
- Store in a clean and dry space.
- To maintain good battery health, the item should be recharged every 6 months. Battery will lose capacity when stored without charging
- If the product gets very hot, please disconnect the item and do not use it.
- Keep out of reach of children.
- Never use the appliance and its battery in extreme conditions (high or low extreme temperatures, high altitude...) during use, storage, or transportation.

- Warning: Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion.
- Replacement of a battery with an incorrect type that can defeat a safeguard.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions,

maybe cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment(WPT) shall be installed and operated with minimum distance 20cm between the radiator & body.
