## Mobile Business MINI Projector

# User Manual

---

## Product Overview:

Dear User,

Thank you very much for your purchase "wireless mini projector" of HOYOTO P company. Mini, Simple and Portable is our biggest characteristic, It's very suitable for business office. Read the entire user manual carefully, Follow all safety instructions in order to ensure proper operation of your device.

Our company will continuously to perfect and strengthen the product quality,

And the software function also constantly update, So the product specifications maybe change as result, Please refer to subject to the material object, all content in this user manual are subject to change without notice, Our company reserves the right of the final interpretation.

Since then hope you setting foot on a good visual enjoy journey...

## Product Features:

- Using wireless and wired transmission technology, wireless communication transmission distance around 12 meters
- Adopting TI 1280 \* 720 DLP projection technology, wide color gamut, color rich, high-definition image.
- The light source adopts OSRAM LED three-primary colors, the useful life lengthen out to 30000 hours.
- Wireless WiFi connect with mobile phone, IPAD and laptop to realize video, music, pictures, documents, web pages real-time HD transmission.
  - 1) Support ISO (5.1 and higher)/Android(above 4.0) system intelligent mobile phone and ipad.
  - 2) Support Windows, MAC OS system have WIFI function computer
- Wired/wireless USB connect computer/ipad will full screen output, supports Windows/MAC OS operating system.
- Support android system or others digital equipment (Miracast) full screen mirroring, and then the screen contents will completely wireless output by projector, share video, music, pictures, documents, web pages, etc.
- Built-in multimedia function and laser pen module, support external TF card (max 32 gb) and can directly read play and projection various formats video/music/photo/document from internal storage.
- The average brightness around 200 lm.
- Support projection image automatic and manual keystone correction.
- Support access HDMI signal and then HD output.

---

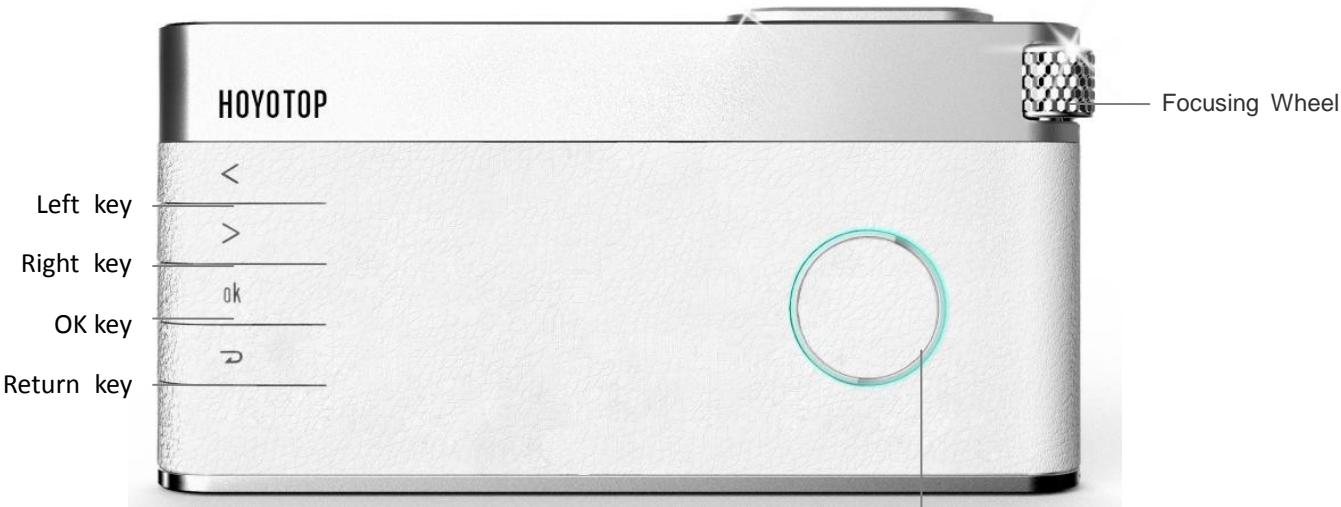

## Product standard

Projection parameters	Projection Technology	TI DLP technology
	Standard resolution	Native 1280x800 pixels, support 1080p
	Contrast Ratio	1000:1
	Projection cover size	5.5 inch --- 80inch
	Projection Distance	0.15m -3m
	Screen Aspect Ratio	16: 9
	Focus	Manual
Lamp parameters	Lamp type	RGB three-color LED light source
	Lamp life	> 30,000 hours
	Brightness	200 lumens
	Brightness Uniformity ratio	90%
Hardware Specifications	Projection Type	Mini Projector
	Dimension	172.5MM * 85MM * 27MM
	Weight	350g
	Port	USB input * 1; TF card (U disk) input (maximum support 32G) * 1; USB External Charging * 1; HDMI input * 1, audio output * 1, IR Input * 1, battery indicator light * 4; 12V power input port * 1
	Built-in speakers	1.5W
	Fan	Japan imported DELTA
	Memory	4GB,maximum expansion16GB
	Battery Specifications	6000mAh lithium polymer battery
Main function	Video Format	HD 1080P (1920 * 1080) play video file, support TS, MPG, MPEG, AVI, MKV, MP4, MOV, DAT, RM, RMVB, VOB video formats decoding picture browsing
	E-Book	Support PDF, WORD, EXCEL, TXT, PPT
	image	Support JPG, BMP
	Audio Format	Support audio decoding of APE, FLAC, MP3, WMA, WAV
	Miracast	Full image transmission (built Miracast, wifi display functions such as cell phones or other products)
Other	Environmental parameters	Operating temperature range: 0 ℃ ~ 40 ℃ (32 ℉ ~ 104 ℉) Storage temperature range: -20 ℃ ~ 45 ℃ (-4 ℉ ~ 113 ℉) Operating humidity range: 10% RH ~ 80% RH Storage humidity range: 10% RH ~ 60% RH

Please use the machine standard configuration power adapter for charging and power supply, other products adapter please don't use for this product, otherwise it will possible hazards such as fire.

### 3) By rain or accidentally fell into the water

This machine not waterproof function, it is forbidden to drop into any liquid, if you accidentally drop into the liquid, please immediately switch to OFF position, timely sent it to our factory obtain after-sales service.

### 4) Clean item

Please don't use any high corrosive liquid to clean the machine, please use soft cleaning cloth and neutral detergent to clean the machine

### 5) Memory card operation

In order to guarantee correctness data, insert card must pay attention to the right direction, after insert the card to ensure that the card has been put in place. In order to guarantee correctness data and extend useful life of the memory card, please pull out memory card under the shutdown state. When you are dealing with data or saving data, please do not outage or plug-pull card, lest cause data damage or loss.

### 6) Please don't disassembly by yourself

---

This machine was composed of high precision components, ban users to remove. Do not remove the projector after failure, refer to "troubleshooting" after operation, such as fault is still cannot be ruled out, please contact the dealer.

#### 7) projector is placed

Please don't put the product on shaky platform, support or the desktop. If this product accidentally drop may be severely damaged. Don't put where the temperature is too high, such as near the heating machine, electric heater. Don't put where excessive moisture, such as dust and smoke, it will pollution optical element, shorten the useful life and make the image darker.

#### 8) About ventilation opening

Grooving and openings for ventilation purposes, to ensure the product reliably operates and to prevent overheating. Do not block or cover these openings. Do not use any type of object from these openings into this product, otherwise it may touch dangerous voltage or short circuit, thus result in fire or electric shock.

## 7. Warranty and copyright information

HOYOTOP commitment that offer 12 months warranty service from the date of you received projector. In general, if the product develops a fault during the 365 days since you received it, and the fault is due to a quality issue rather than your own breakage or misuse. please show your warranty card, and write down detailed related content, then send projector and warranty card back to our factory, when we receive your authorized return, we will repair the product for free and send it back to you for free, repairing may involve changing parts for example a faulty screen, in general you will receive back, fixed, the same product you returned to us. If a repair is impossible we will credit you what you originally paid so you can choose to buy a new one or change to a different item.

## 8. FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

---

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
