

Product manual

The biggest feature of this product is wireless control (no power line, no signal line), small size, easy to move, suitable for carrying, fool type programming, simple control

The product has strong anti-interference ability, stable and reliable operation

Support mobile intelligent equipment download and install intelligent control APP "FGL""

Products can be applied to wedding celebrations, commercial performances, buildings, landscape lighting and other places

Adopting the international dual communication module of 2.4G, the anti-interference capability is strong, the connection is stable, the signal transmission distance is far, and the firmware remote upgrade is supported

Imported LED, high brightness, stable performance, long life, soft light, bright colors, pure, completely flicker

The - 45mm materials for optical lens PC lens, high temperature resistance, uniform spot, less scattering

With natural air cooling system, the noise is almost zero.

The LED drive board and the electronic control board are modular and easy to maintain and update. Highly integrated and modular design makes the PCB board small size, powerful and stable performance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of

the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
