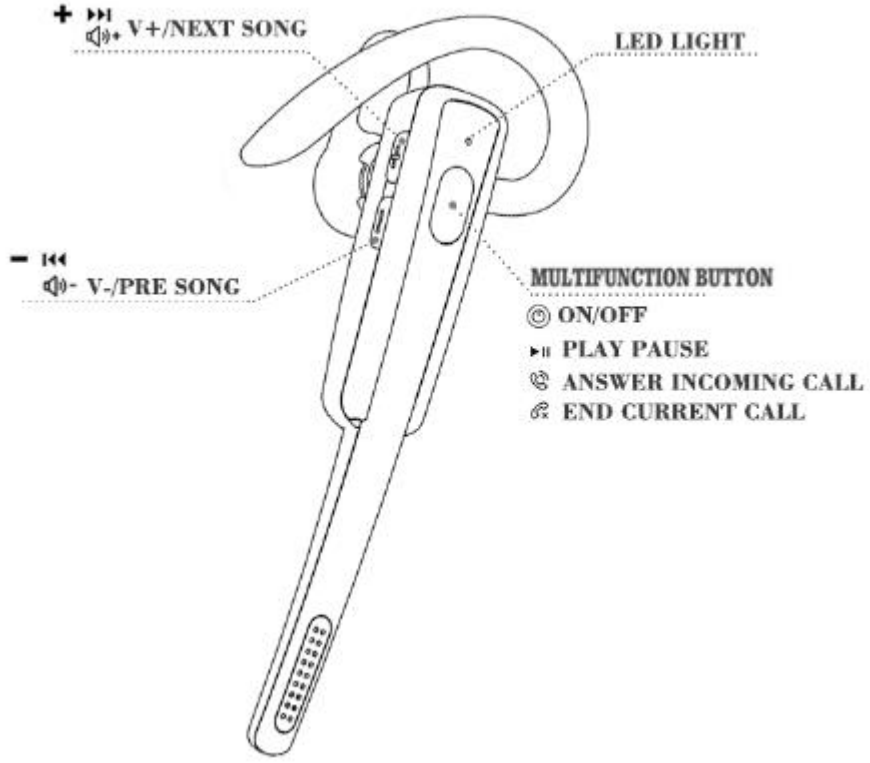
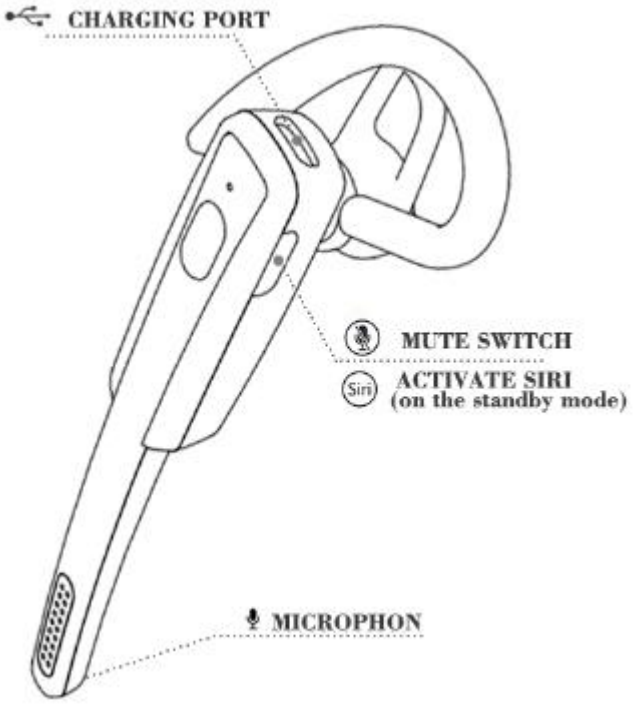
Bluetooth headset





Brief Introduction

• The implement of Bluetooth wireless technology in telecom products has opened up a brand-new filed. Bluetooth wireless devices are no longer dependent on cables but instead use built-in wireless receiver for communication. The receiver adopts global radio frequency, which guarantee that it is worldwide available. Universal and compatible with most of Bluetooth-enabled computer, laptop, tablet and cellphones, this Bluetooth headset can instantly connect to other Bluetooth devices from up to 33 feet away.

• With enhanced echo cancellation, noise suppression and stable signal, this earphone allows you to listen and talk clearly, even though you are driving in noisy environment or talking in the crowd.

• Hands-free ear hook design allows you to enjoy your conversation and hear streaming music and GPS directions without holding your phone or getting tangled in wired headsets.

Product Specifications

• Bluetooth Version: V 4.1
• Micro USB charging port
• Support HFP, HSP, A2DP and AVRCP profiles
• Operating Range: up to 33 feets (accessibility, empty place)
• 85mAh rechargeable battery
• Talk time: 6.5 hours
• Music play time: 6 hours
• Standby time: 180 hours
• Charging time: about 1.5 hours
• iPhone battery indication
• Working environment: -10～50℃
• There are USB cable and 2 earbud tips on the button of the headset box

Features

• Built-in intelligent voice prompts
• Built-in high definition microphone, advanced 4X noise cancelling technology.
• Ergonomics, lightweight design. 360 degrees adjustable,180 degree rotatable apply to both left and right ears.
• Separate power mute and volume buttons allow easy access and control.
• Pair easily with any two Bluetooth devices at one time.
• Compatible with all Bluetooth-enabled devices and high-fidelity stereo music player.

Indicator Light

- Matching status: red and blue light blinks alternately.
- The pairing is successful: blue lights flash.
- Charging status: red light keeps flashing.
- Charging completed: red light turns off, or blue light keeps flashing.
- Low-power status: red light turns on with indicate voice.

Bluetooth Headset Connection

Before using your headset for the first time, you must pair it with your Bluetooth-enabled phone.

1. Place the headset within 1 meter with the mobile phone.
2. Ensure that the headset is off (see “Turn off” in “Basic Operation” section above). And the mobile phone Bluetooth setting is activated.
3. Press and hold “MFB” button for about 2 seconds until the indicator light alternately flashes blue and red, now the headset is under pairing mode.
4. Your phone will find the “A12” headset and press “A12” on the mobile phone, after connected successfully, the headphone will turn to blue light blinking which means the matching is finished. Now you can listen to the phone music and take a phone call.
5. If your mobile phone is below version 2.1, then you need to enter password “0000” .

Warm Prompt:

1. Mobile already matched will no need to match again, the headphone will automatically match the previous device and make connection.
2. The maximum matching time is no longer than 10 minutes. If you exceeded such time it will drop out the matching status. If you still can’t match successfully, please repeat the above steps to match again.
3. The headphone will automatically shut down when it being no-connection over 11 minutes.
4. You will hear a voice prompt “disconnected” when you are out of Bluetooth range.

Pairing Your Headset with Two Mobile Phones (Multipoint Connection)

A12 supports a multipoint function to allow simultaneous pairing of the headset with two mobile

phones.
1. Follow the pairing procedure as instructed in “Bluetooth Headset Connection” section to pair the headset with the first mobile phone.
2. Turn off the Bluetooth of your first mobile phone, then the headset enters the pairing match status.
3. Repeat the same pairing procedure on the second mobile phone.
4. On the first mobile phone’s menu, activate its Bluetooth connection with the headset.
5. Turn off the headset. Then turn on the headset again. The headset will automatically connect two mobile phones. Now you can listen to the phone music and take a phone call.

Disconnection

If you want to disconnect the headset from your mobile phone, please take the following steps:
1. Turn off the headset directly (see “Turn off” in “Basic Operation” section).
2. Disconnect from the mobile phone

How to Enter the Pairing Status Again?

If you want to enter the pairing state once again while the headset has been connected, please take the following steps:
1. Turn off Bluetooth on the mobile phone’s menu, and the headset will enter the pairing match status again. Then you can connect other Bluetooth device.
2. Turn off the headset, then press and hold the “MFB” for 2 seconds until the indicator light alternately flashes blue and red, now the headset is under pairing mode. Then you can connect other Bluetooth device.

Steps of Connecting Computer

- First download a universal driver software.
- Installed successfully, you will have a little gray icon (Bluetooth icon) in the bottom right corner of your computer.
- Then plug in the Bluetooth adapter, at this point, the gray Bluetooth icon will turn to blue.

Note: Notebook computer with Bluetooth function does not need external Bluetooth adapter which need to buy separately. Right click on the Bluetooth icon, select “show the classic interface”.

- When the Bluetooth headset turned off, press and hold “MFB” button for 2 seconds until red and blue lights flashing (matching), headset has entered the search state at this time.
- Right click on the computer interface, select the “search” equipment, the headset must be in pair (red and blue lights flashing) , then the computer will search for all nearby Bluetooth devices.
- Double-click the computer and search for A12 Bluetooth headset.
- Right-click the A12 and select “ Bluetooth audio high quality”.

Here, congratulations! Bluetooth headset has been successfully connected with computer, and now you can listen to the music and voice chat from computer!

Wearing Instruction

A12 Earphones are designed with an emphasis on ergonomics, your convenience and comfort is our priority. Adjustable ear hook fits a wide range of ear shapes. No worry that the headset will fall and lose regardless of you are in walking, hiking, or exercise. Two optional ear caps are equipped. The flip-boom arm allows to adjust the angle and fit this headset in right or left ear.

Here attaches two sets of ear pouches which can be used interchangeably depending on the individual wearing habit. And you can adjust the sound quality of the earphones' tri-band and noise reduction through the fit of the size of ear pouches and ear canals. Comfortable wearing can bring you a perfect sense of listening and a good pleasure with enjoying the wonderful sound.

▲WARNING!

Charging voltage: 4.2-5V. No more than 5V! Over voltage will damage battery.

Note:

1: The phone can't find the Bluetooth headset

Possible Reasons:

A. Bluetooth headset is not under ON and standby state.

B. Bluetooth headset program is error.

C. Bluetooth program of the phone is error.

Solutions:

A. After turning off the Bluetooth headset, hold the "MFB" button (red and blue indicator flashes by turn) to enable Bluetooth pairing.

B. Recover the Bluetooth headset to default setting.

C. After restart the phone, remove all pairing data in the Bluetooth of the phone.

2: No sound from the headset

Possible Reasons:

A. The volume of the phone is unsuitable.

B. The Bluetooth headset and phone are not correctly connected.

C. The Bluetooth headset is out of the working range.

Solutions:

A. Adjust the volume of the phone.

B. Operate with the reference of the use steps.

C. Keep the headset in the range of 10 feet to the phone without any obstacle.

Cautions:

A. Do not have any other operation when searching Bluetooth for avoiding program error.

B. Please use Bluetooth near the phone to assure best effect.

▲Tips：

The Bluetooth range is up to 33 feet at barrier free and empty place. Some obstacles will reduce call quality and distortion like wall, cloth and some other solid. Bluetooth is over 20 feet (6 meters) in obstructed environment.

3:Charging red indicator doesn't light on

Possible Reasons:

It is not used for a long time.

Solutions:

Charge for about 30 minutes, and then the red indicator may light on.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
