Inquiry on 09/14/2017 :

Inquiry:

Dear Sir/Madam:

hello!

our product is heater insdide and used for snowshoes.

you can use it connect to APP via BT or not connect to APP used directly

regard to the label requirement we intend to make the lable in the APP (installed in the phone) startup picture.

does it ok?

FCC response on 09/15/2017

The following information can be obtained from our website at <http://transition.fcc.gov/oet/ea/> if you use the e-label you must meet all the requirements in the rules for e-label. Also, labelling guidelines can be found in our Knowledge Database (KDB) Publication #784748.

---Reply from Customer on 09/17/2017---

Dear Sir/Madam:

Good morning!

Thank you for your replying.

I am so sorry to express my opinion that our product is so small and only used for heating the snowshoes and inside in it. By the way, Only small part will be outside the snowshoes.

Furthermore our product and snowshoes will be came out togather and cannot be operated without APP

present the e-labelling information through an audio message or a host device displayscreen connected via physical connection, Bluetooth, Wi-Fi, etc already accepted by IC.

If my suggestion can not be adopt

Could I present the e-labelling information in the instruction.

Thank you very much.

FCC response on 09/18/2017

Yes you can use.
