

DJI Video Transmitter

User Guide

Introduction

DJI™ Video Transmitter features DJI O3 Pro technology that provides video transmission with a maximum transmission range of 6 km, bit rate of up to 50 Mbps, and minimum end-to-end latency within 100 ms. DJI Video Transmitter works at 2.4 GHz, 5.8 GHz and DFS, and is capable of selecting the best transmission channel automatically. It supports AES 256-bit encryption algorithm, and can output 1080p/60fps full HD images to multiple high-bright remote monitors at the same time.

DJI Video Transmitter provides various power supply ports, which support DJI WB37 batteries, and can take power from Ronin devices through the DC-IN port. It provides various video input and output ports such as HDMI-IN and SDI-IN, to fit most of the cameras on the market. It also supports SDI loop-out function, which can be used with an external monitor.

DJI Video Transmitter is also equipped with a 1-inch OLED color screen, which can be set through interactive buttons; built-in fan and precision metal design of the shell allows the transmitter to be used normally in various harsh scenes, meeting the shooting needs of various requirements such as radio and television, film, commercials, documentaries and so on.

Environmentally friendly disposal

Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.

Umweltfreundliche Entsorgung

Dies ist das Symbol für die getrennte Sammlung von Elektro- und Elektronikgeräten. Elektroaltgeräte dürfen nicht zusammen mit dem Restmüll entsorgt werden (einschließlich Batterien, Akkus und Lampen), sondern müssen separat entsorgt werden. Die Entsorgung an der kommunalen Sammelstelle durch Privatpersonen oder an den von Händlern oder Herstellern eingerichteten Sammelstellen ist kostenlos. Der Besitzer von Altgeräten ist dafür verantwortlich, die persönlichen oder vertraulichen Daten auf den zu entsorgenden Altgeräten zu löschen und die Geräte zu diesen oder ähnlichen Sammelstellen zu bringen. Die Händler sind verpflichtet, Elektroaltgeräte für dich kostenlos zurückzunehmen. Durch diesen geringen Aufwand kannst du zur Wiederverwertung von wertvollen Rohmaterialien beitragen und dafür sorgen, dass umweltschädliche und giftige Substanzen ordnungsgemäß unschädlich gemacht werden.

Tratamiento de residuos responsable con el medio ambiente

Los aparatos eléctricos viejos no pueden desecharse junto con los residuos orgánicos, sino que deben ser desechados por separado. Existen puntos limpios donde los ciudadanos pueden dejar estos aparatos gratis. El propietario de los aparatos viejos es responsable de llevarlos a estos puntos limpios o similares puntos de recogida. Con este pequeño esfuerzo estás contribuyendo a reciclar valiosas materias primas y al tratamiento de residuos tóxicos.

Mise au rebut écologique

Les appareils électriques usagés ne doivent pas être éliminés avec les déchets résiduels. Ils doivent être éliminés séparément. La mise au rebut au point de collecte municipal par l'intermédiaire de particuliers est gratuite. Il incombe au propriétaire des appareils usagés de les apporter à ces points de collecte ou à des points de collecte similaires. Avec ce petit effort personnel, vous contribuez au recyclage de matières premières précieuses et au traitement des substances toxiques.

Smaltimento ecologico

I vecchi dispositivi elettrici non devono essere smaltiti insieme ai rifiuti residui, ma devono essere smaltiti separatamente. Lo smaltimento da parte di soggetti privati presso i punti di

raccolta pubblici è gratis. È responsabilità del proprietario dei vecchi dispositivi portarli presso tali punti di raccolta o punti di raccolta analoghi. Grazie a questo piccolo impegno personale contribuirete al riciclo di materie prime preziose e al corretto trattamento di sostanze tossiche.

Milieuvriendelijk afvoeren

Oude elektrische apparaten mogen niet worden weggegooid samen met het restafval, maar moeten afzonderlijk worden afgevoerd. Afvoeren via het gemeentelijke inzamelpunt is gratis voor particulieren. De eigenaar van oude toestellen is verantwoordelijk voor het inleveren van de apparaten op deze of vergelijkbare inzamelpunten. Met deze kleine persoonlijke inspanning lever je een bijdrage aan de recycling van waardevolle grondstoffen en de verwerking van giftige stoffen.

Eliminação ecológica

Os aparelhos elétricos antigos não podem ser eliminados juntamente com os materiais residuais. Têm de ser eliminados separadamente. A eliminação no ponto de recolha público através de entidades particulares é gratuita. É da responsabilidade do proprietário de aparelhos antigos levá-los a estes pontos de recolha ou a pontos de recolha semelhantes. Com este pequeno esforço pessoal, contribui para a reciclagem de matérias-primas úteis e para o tratamento de substâncias tóxicas.

Изхвърляне с оглед опазване на околната среда

Старите електрически уреди не трябва да се изхвърлят заедно с битовите отпадъци, а отделно. Изхвърлянето в общинския пункт за събиране на отпадъци от частни лица е безплатно. Собственикът на старите уреди е отговорен за пренасянето на уредите до тези или до подобни събирателни пунктове. С това малко собствено усилие допринасяте за рециклирането на ценни суровини и за обработката на токсични вещества.
