## Restricted substance or element identification table

Part Name	《 Electronic Information Product Pollution Control Management Measures 》 Restricted Substances or Elements					
	Pb	Hg	Cd	CrVI	PBBs	PBDEs
Sheet metal parts	×	○	○	○	○	○
Plastic parts	○	○	○	○	○	○
Circuit board	×	○	○	○	○	○
Lens	×	○	○	○	○	○
Power	×	○	○	○	○	○
Appurtenance	×	○	○	○	○	○

### Explain:

1. ○ means that the content of restricted substances in all homogeneous materials of this part is below the limit requirements specified in the SJ/T 11363–2006 standard;

2.X means that the content of the restricted substance in at least a certain homogeneous material of the part exceeds the limit requirement of the SJ/T 11363–2006 standard.

### FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
