7435 Oakland Mills Road  
Columbia, MD 21046  
USA**

**Product Name:** Shortwave transceiver

**Model Number:** G90

XIEGU

**Trade Mark:**

**FCC Identifier:** 2ANLH-G90

Gentlemen:

This device must be used with the scanning receiver and cannot be used with other equipment.

The device cannot produce any signal.

This device complies with FCC Rules, 2.815

The Shortwave transceiver equipment meets the requirements of the FCC Rules, 15.121(a). Compliance is achieved through the following methods:

The Shortwave transceiver in this equipment is incapable of tuning, or readily being altered, by the User to operate within the frequency bands allocated to the Domestic Public Cellular Telecommunications Service in Part 22.

Blocking of the cellular frequencies is implemented in the firmware of the unit's main control central processing unit (CPU). Coverage of 824 - 849 MHz and 869 - 894 MHz is completely blocked, since it is done in the microprocessor, and cannot be re-enabled by any user-accessible procedure, including diode, resistor, or jumper changes, nor by connection of any external device such as a personal computer, nor by installation of any "special" enabling semiconductor device.

The device shall not be capable of amplification in the frequency band 26-28 MHz.

The device is designed so that the tuning, control and filtering circuitry is inaccessible.

Sincerely,

Signature:
