GLOBAL EXPERIENCE INNOVATORS, INC.
3655 N.W. 87TH AVENUE
MLGL-815
MIAMI, FL 33178

FCC ID: 2ANQX-01042017

To Whom It May Concern:

Global Experience Innovators, Inc. ("GEI"), a wholly owned subsidiary of Carnival Corporation, is submitting this application for the certification of our Ocean Medallion, FCC ID: 2ANQX-01042017 under FCC 15.247. The Ocean Medallion is a wearable device for Identification of passengers on a cruise ship for the purpose of door access, payment for goods and services on-board the cruise ship, and passenger experiences through detection of their presence. It communicates with Sensors fitted on-board the cruise ship through Bluetooth Low Energy and Near Field Communication. It contains a Lithium cell battery (to be referred to as Lithium Cell in the document) that provides the energy necessary for the wireless communication between the Medallion and the Sensors on the cruise ship. It contains 4 permanent magnets for attachment to Wrist Bands, Pendants and other accessories, each with matching magnets to keep the Medallion in place. The Medallion's housing is hermetically sealed to allow passengers to wear it while swimming. This seal will prevent water ingress up to a water pressure of 5 ATM (this is approximately a depth of 50 meters).

On the schematic, the NFC part, operates as a passive tag.

Global Experience Innovators, Inc. is a wholly owned subsidiary of Carnival Corporation. Any further reference to Carnival Corporation is in actuality a reference to Global Experience Innovators, Inc.

Sincerely,

Title: Senior Vice President, Guest Experience Design & Technology
