

This information will be included in the packaging with the Ocean Medallion when it is given to the end user.

Ocean Medallion User Manual

The Ocean Medallion contains no user controls or user serviceable parts. There is no user mechanism to turn off the radio transmitter in this device.

Due to the small size of the Ocean Medallion, regulatory information has been placed in the user manual. The FCC ID:, IC: , and HVIN: may be viewed below in this manual. The Ocean Medallion does not electronically display this information.

The Ocean Medallion has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

This device, FCC ID: 2ANQX-01042017 complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device, IC: 23194-01042017, HVIN: 20-10135, complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme aux normes RSS exonérées de licence d'Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes: (1) cet appareil ne doit pas provoquer d'interférence, et (2) cet appareil doit accepter toute interférence, y compris les interférences susceptibles de provoquer un fonctionnement indésirable de l'appareil.
