In the main menu interface, click on the "Application" icon to enter the application interface.

Application interface is to display the Application shortcut icon, sliding around can reading function application shortcut icon, click on the icon to go into the function.

4.8 Reverse video

The device is equipped with a special rearview camera , the camera need professional installation, during normal driving, will automatically record , you will appear the reversing image, to avoid reversing the problem.

4.9 Data link

◆ WIFI data link

Open /close WiFi: "general settings" click "interface equipment", then the "WiFi" interface "WiFi" is selected, you can open the WiFi.

Network access: click "Settings" → "equipment" → " WiFi connection " → "open WiFi, can be connected to the network, the input in the dialog box that appears after the password,Click " Connect ", can be connected to the network. This is the first time into the operation of the WiFi network;

When connected to the network, open the "WiFi", which can be automatically connected to the network.

◆ Third-party software installation

In order to guarantee the smoothness and stability of the system, as well as your valuable traffic, the machine did not provide the app store, do not to install or less installing third-party software.

The software has the following several installation methods to install and operate steps:

- ① Can be directly downloaded from the browser, download the installer, and download files stored in the root directory of the unit, can be found by ES file browser and click install.
- ② Download android software installation package, stored in the SD card or USB disk, you need to download software, plug in SD card or USB drive to find the APK accordingly, Click to install APK, pops up installation interface, click ok to install, click cancel to cancel installation.
- ③ Download the app store.

4.10 ES File Explorer

In the main interface, enter the application function to find the "ES File Explorer" icon click into the ES File Explorer function interface.

- ① Click the "  " button on the upper left corner, you can choose the main page, main directory, root directory management, browse files in the SD card.
- ② Shortcut keys on the toolbar can be completed the selection, copy, delete, search files, management applications and other operations.
- ③ Access files on SD card >> in the ES File Explorer main interface >> click "  " button to select.

5 Trouble Shooting

If problems can not be solved effectively, please contact our company or professional service center.

Problem	Possible Cause	Remedy
Cannot turn on the computer	Car battery power supply shortage	Power the car battery through external power supply to check whether the external power supply is in good contact
	System crash	① To Reset (needle insertion machine T card position of the Reset button next to the Reset hole). ② Long press the power button for 3 seconds, the screen will be black to drop, the extra long press for 3 seconds, the system will restart.
Unable to display/can't see content	Background brightness is too low	Adjustable light background light
	Background light has shut down automatically	Press the power key wake up the screen, face the screen set out in the set
Play the silent	The volume set too low	Increase the volume
	FM launches not closed	When not use FM function please close FM
Can't receive GPS signals	GPS signal is weak position	Depending on local GPS satellite signal strength, weak signals may have to wait more than 2 minutes
Without a map	The map did not download	Please download map

Problem	Possible Cause	Remedy
Can't video	① TF card is not inserted; ② The TF card lock file is full	① Insert is not lower than class8 grade TF card, it is best to class 10 ② The product will not automatically delete the lock file, when the TF card is less than 300 MB of storage space,products can play box tip need to clean up, if not timely cleaning will fill TF card, need to hand Move to delete.
Unable to cycle to record	Check to see if the video has been locked	Unlock the videos, circulating recording
The recording file caton	TF card speed is too low or the stronghold	Use no less than class8 grade brand TF card, it is best to class 10
Long time not to use GPS	Long time not positioning	GPS signal is weak, but to the empty place to locate

Remarks:

The attachment list is only for reference, Specification is subject to change. Please refer to the machine for actual data.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The distance between user and products should be no less than 20cm.
