Radio 148221

This is an original certification for a single-modular RF data transceiver that operates in the 902-928MHz ISM band using proprietary FHSS rules as described in FCC 15.247.
See the Modular Approval Letter for details.
A detailed radio description can be found in the operational description documentation.

Radio 148221 may be referred to as RM148221 or RM 148221 interchangeably throughout all paperwork.
