

Pet Partner Robot

Technical parameters

Size	363x232x280mm
Master chip	Core ARM-1176JZF@600MHz + STM32
Camera	1.0 MP
FLASH	32MB
Walking brushless motor	Rotating speed: 355RPM Rated voltage: 12V DC
Serving motor	no-load speed: 10000±12% RPM Rated voltage: 16.8V DC
Stepper motor	Starting torque: 400g.cm/600pps Number of phases: 2 Reduction ratio: 1:25 Rated voltage: 12V DC
Adapter	The output voltage: 20V Output current: 1A
Battery	Battery type: Lithium battery Battery capacity: 2500mAh Operating Voltage: 14.8V
Power consumption	Maximum output power: 40W Standby power: 3.2W
Temperature range	Temperature: -30℃~60℃
Humidity range	Humidity: ≤85%RH(No condensation)

APP installation

Method: Apple mobile phone user enter APP store to seek “ant robot” to install;Android mobile phone user enter Tencent Application to seek “ant robot” to install.

Device connection preparation

Pet robot(called robot)’s screen displays as below after it powers on:
Time and date: Display current date and time;
Electricity display: Display battery level or state of charge;
Voice identification: Voice on, voice off;
Name: Pet robot’s name;
Network mode: WiFi display current WIFI name which connect with robot, hotspot display robot’s hotspot name;
Status: Display current operation mode: Recharge mode, auto play mode, manual control mode;
Feeding summary: Summarize total times for feeding(manual feeding and timing feeding);

Picture 2–1

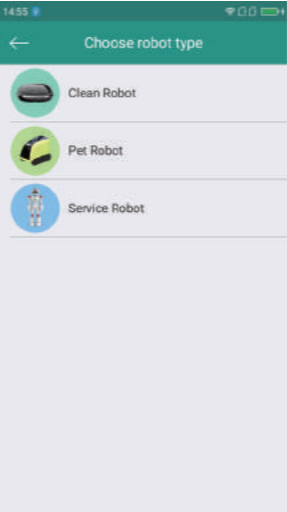

Hotspot connection with robot

Step:

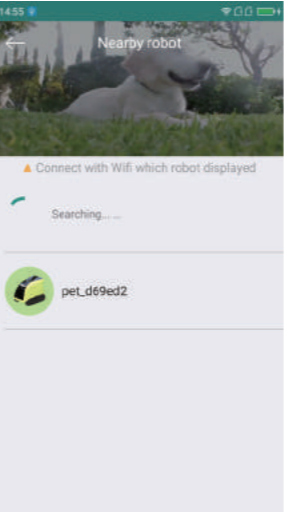

1. Pet robot recharge and power on, check the hotspot name on the screen (refer to picture2–1) ;

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body
