

# Switcheroo™

Switcheroo™ Model SW-1001LN

## USER MANUAL

### WARNING

#### Risk of electric shock

- For indoor use only
- Do not use in wet locations
- Keep away from children

#### Risk of fire

- Do not exceed electrical ratings

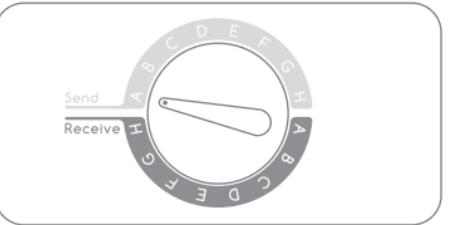

### CAUTION

Intended for residential lighting use only

Electrical Rating: 120v AC, 5A, 60Hz, 600W

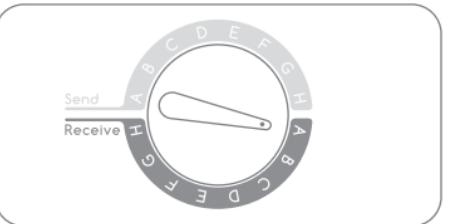

## Instructions for Use

### Step 1

Set Switcheroo™ to "Send" mode and pick a channel, then plug it into a switched outlet.

### Step 2

Set one or more other Switcheroos™ to "Receive" mode on the same channel. Plug them into standard outlets.

### Step 3

Plug lamps into configured Switcheroos™ as desired. The "Send" unit does not need to have a lamp plugged into it for the system to work.

### Step 4

Turn on your light switch and watch all of the lamps turn on together!

## Other Uses

Switcheroo can:

- Control lights from anywhere inside a typical household (up to 100 feet, including through walls).
- Be used with timers, smart plugs, and remote-controlled outlets to fully automate your home
- Be used with two (or more) "Send" units set to the same channel. If at least one "Send" unit is on, the receivers turn on.
- Be used on different channels for up to 8 different configurations in your home. The channels are all on separate frequencies so they never interfere with each other.
- Be used with as many "Receive" units on each channel as you can fit in a house. The possibilities are endless!

This device complies with Part 15 of the FCC Rules, Operation is subject to the following two conditions:  
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

REV020318

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

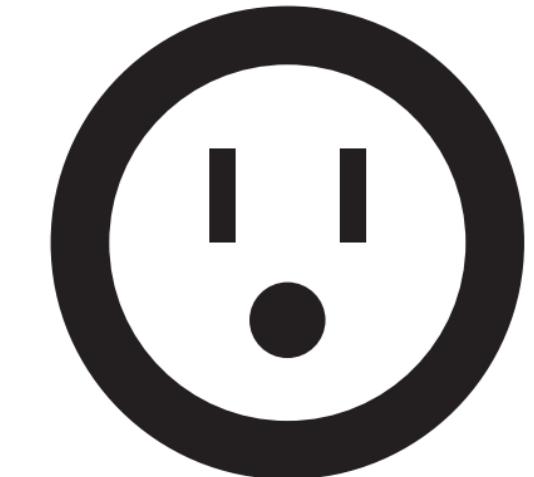

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:  
(1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

## TROUBLESHOOTING GUIDE

Problem	Solution
Receiving unit is <b>ON</b> when it should be <b>OFF</b>	<ul style="list-style-type: none"><li>- Change system to a different available channel</li><li>- Ensure that no other "Send" units are set to the same channel</li></ul>
Receiving unit is <b>OFF</b> when it should be <b>ON</b>	<ul style="list-style-type: none"><li>- Change system to a different available channel</li><li>- Ensure that the devices are not too far apart (generally about 100 feet)</li><li>- Ensure that the "Send" unit is receiving power (plugged in lamp is on)</li><li>- Confirm that no other interfering devices are nearby (cordless phones and other wireless devices)</li></ul>
Receiving unit is intermittently <b>ON/OFF</b> (blinking)	<ul style="list-style-type: none"><li>- Change system to a different available channel</li><li>- Ensure that the devices are not too far apart (generally about 100 feet)</li><li>- Confirm that no other interfering wireless devices are nearby</li></ul>
