ATTESTATION LETTER FOR LABEL LOCATION

FCC ID: 2AO22-S30000 IC: 23623-S30000

To Whom It May Concern: We, CourtMatics Corp., declare justification to place FCC Identifier in the user manual to pursuant to KDB 784748 D01 Labelling Part 15 &18 Guidelines v08 and ISEDC (per RSP-100, Issue 1, January 2016)

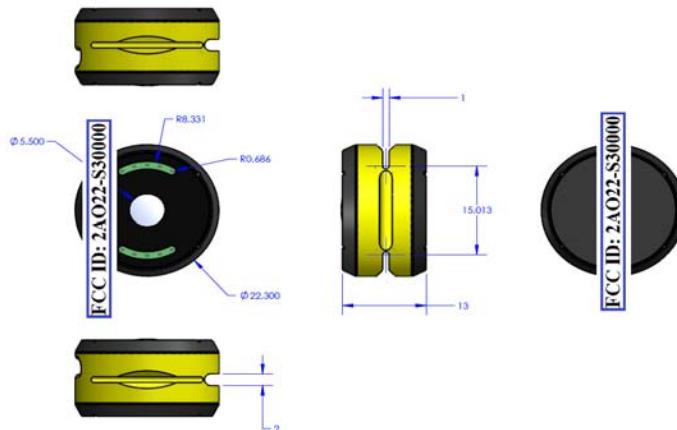

784748 D01 Labelling Part 15 &18 Guidelines v08

If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small – the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information. Justification for placing the FCC ID in the manual must be submitted with the initial application for certification for review and approval.

ISEDC (per RSP-100, Issue 1, January 2016):

3.1 The HVIN and ISED certification number shall be permanently indicated on the exterior of the product or displayed electronically according to e-labelling requirements. If the dimensions of the product are extremely small or if it is not practical to place the label or marking on the product and electronic labelling has not been implemented, the label shall be, upon agreement with Innovation, Science and Economic Development Canada prior to certification application, placed in a prominent location in the user manual supplied with the product. The user manual may be in an electronic format and must be readily available.

Font size: 1.2pt

It is difficult to apply ISEDC and FCC ID on a device due to small size and mechanical structure of the device.

ISEDC and FCC ID will be applied on user manual and packaging box.

Sincerely Yours,

Vadim Blank
