## 2-in-1 Charging Stand

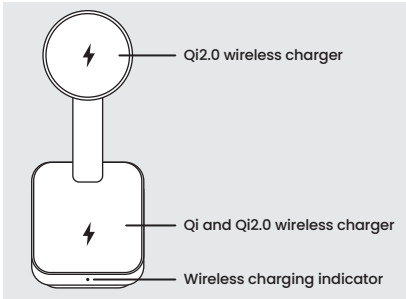

### Instruction Manual

#### Package Contents

- 2-in-1 Charging Stand

#### Compatibility

- Devices supporting the Qi or Qi2.0 standard

#### Quick tips

- The device should stick firmly when charging
- Thick cases as well as some materials can interfere with wireless charging

#### Indicators

- Solid Red - Charging your device
- Solid White - Fully charged
- Flashing Red - Foreign object detection, pieces of metal or other materials may cause overheating and damage your charger or device; remove them immediately

#### Charging - set up

- Place the charging stand on a sturdy flat surface
  - Connect the Power Delivery wall plug to the wall outlet using the USB-C cable
  - Make sure your power source is a USB-C power supply of DC 9V 3.0A minimum
- warning:** please use UL compliant power supply

#### Charging - Qi2.0

- Place your Qi2.0 compatible device onto the Qi2.0 Wireless Charger; the device will stick to the charging stand and the screen will indicate that it is charging (note: Qi2.0 compatible device can be placed vertically or horizontally)

- Charge time will vary by device

**warning:** When using the Qi2.0 Wireless charger be sure to remove metallic cases or other metallic items as they may cause overheating and possibly damage your device or the charger

#### Charging - earbud case

- Place your earbud case onto the wireless charger, face up, and align the center of the case with the lightning symbol on the wireless charger or the device may not charge
- Ensure that the earbud case lid is closed
- Wireless charging indicator light will turn solid red to indicate it is charging
- Charge time will vary by device

#### Troubleshooting

When the devices are properly aligned, the wireless charger indicator light will turn red and/or the Qi2.0 devices charging screen will appear

If the wireless device is not aligned properly, the indicator light will not turn on; if the Qi2.0 device will not stick to charging pad, remove the case and try again

- Does not charge Apple Watch®
- Double check that the USB-C cable and Power Delivery wall plug are plugged in
- Certain cases may interfere with wireless charging; remove the cases for best results
- Double check the placement of the devices on the chargers; for best results, the center of the devices should be on the lightning symbol of the chargers
- Please consult your device's user manual if you are unsure if your device is compatible

#### Safety

- Remove credit cards and other cards with magnetic strips to prevent damage to the cards
- Keep the charger away from heat and direct sunlight
- Do not modify or repair this device
- Do not use in high temperatures or extreme weather
- Do not use chemical detergents to clean your device, use a soft dry cloth
- Immediately unplug it from its power source if it gets wet

FCC ID: 2A023-QIC45M Model: QIC45M Input: 5V~3A 9V~3A Qi2.0 Wireless Charging Output: 15W Max Qi Earbuds Wireless Charging Output: 5W Max Made in Vietnam

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation. Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
