<p>INSTRUCTIONS FOR INSTALLATION</p> <ol style="list-style-type: none"> Choose where you plan to install your smart car holder, by either connecting the Air Vent Clip to the air vent of your choice, or on your windshield or dashboard with the suction cup base. Insert the adjuster into the ball joint adapter as shown in the diagram. Insert the ball into the socket located on the back of the smart car holder bracket and tighten. When you have set up a safe viewing position (on your dashboard, windshield or air vent) fix the car holder position, tight the gear switch or lock the multi-position switch as required. <p>INSTRUCTIONS FOR CHARGING</p> <ol style="list-style-type: none"> Connect the Car Wireless Charger to the car's cigarette lighter socket with the USB cable. When the indicator flashes green and red alternately it will enter in standby mode, when it's fixed in green it will be on. When the phone is near the infrared sensor, the Wireless Charging Cradle Dock will automatically lock. Please place your phone in the middle of the charging area, the holder will close itself to catch it. Once the phone is locked the charging process starts automatically. The LED will be fixed red to indicate it's still charging. 	<p>LED FUNCTIONS</p> <table border="1"> <thead> <tr> <th>LED INDICATION</th> <th>MEANING</th> </tr> </thead> <tbody> <tr> <td>Solid Red Light</td> <td>Charging a device</td> </tr> <tr> <td>Solid Green Light</td> <td>Your device is fully charged</td> </tr> <tr> <td>Solid Green Light</td> <td>The Inteligrip is in standby Mode</td> </tr> <tr> <td>Light Flashes Red Every 0.5 Seconds</td> <td>FOD Warning</td> </tr> <tr> <td>LED Flashes 4 Times (Green, Red, Red/Green, Green)</td> <td>Power Transfer</td> </tr> </tbody> </table> <p>PRODUCT SPECIFICATIONS</p> <table border="1"> <tbody> <tr> <td>Input Voltage: 9V/5V</td> </tr> <tr> <td>Input Current: 1.67A/2A</td> </tr> <tr> <td>Output Power: 10W/7.5W/5W</td> </tr> <tr> <td>Working Frequency: 111.7-182.3KHz</td> </tr> <tr> <td>Power Conversion: 65%-83%</td> </tr> </tbody> </table>	LED INDICATION	MEANING	Solid Red Light	Charging a device	Solid Green Light	Your device is fully charged	Solid Green Light	The Inteligrip is in standby Mode	Light Flashes Red Every 0.5 Seconds	FOD Warning	LED Flashes 4 Times (Green, Red, Red/Green, Green)	Power Transfer	Input Voltage: 9V/5V	Input Current: 1.67A/2A	Output Power: 10W/7.5W/5W	Working Frequency: 111.7-182.3KHz	Power Conversion: 65%-83%	<p>SAFETY PRECAUTIONS</p> <ul style="list-style-type: none"> Carefully inspect your charger before attempting to use for the first time. Do not attempt to pierce, strike, or apply strong pressure with sharp or heavy objects. Strong impact or shocks could cause irreversible damage to the unit. Do not operate the charger if it has been exposed to any liquid or if it is visibly wet or moist. Do not charge devices unattended. Keep the charger away from small children at all times, or ensure strict supervision by an adult at all times. Always remember to unplug from your DC outlet when not using the charger. Do not expose the charger or any electrical parts to extremely high or extremely low temperatures or high pressure. Do not expose the charger to fire, direct sunlight, or other hot location. This may cause the unit to generate heat, ignite, or explode. Using the charger this way may also result in a loss of performance and in a shortened life expectancy. Do not attempt to disassemble or modify the smart wireless charger car holder in any way. Immediately discontinue use of the charger if it has any visibly exposed parts or appears malfunctioning in any way.
LED INDICATION	MEANING																		
Solid Red Light	Charging a device																		
Solid Green Light	Your device is fully charged																		
Solid Green Light	The Inteligrip is in standby Mode																		
Light Flashes Red Every 0.5 Seconds	FOD Warning																		
LED Flashes 4 Times (Green, Red, Red/Green, Green)	Power Transfer																		
Input Voltage: 9V/5V																			
Input Current: 1.67A/2A																			
Output Power: 10W/7.5W/5W																			
Working Frequency: 111.7-182.3KHz																			
Power Conversion: 65%-83%
