Thanks for choosing us! This wireless charge is compatible with any cellphone with QI standard, it'll bring you amazing experience of life with its modern design with safety.

Please kindly read the user manual before using and keep it for future reference.

Product Outline

Instructions:

1. Power the product through a power adapter or computer.
2. After the product is powered on, the product emits a soft white light without placing the device.
3. After placing the device that needs to be charged on the product, the product will automatically charge the device, meanwhile, it will remind the product to charge the device by breathing light.

Notes:

1. Do not disassemble this product or put it into fire or water to avoid short circuit leakage.
2. Do not use this product in severe hot, humid or corrosive environment, to avoid damaging the circuit.
3. Please use a qualified USB power adapter, or it may cause unstable charging.
4. Do not place metal debris or magnetic cards on the product, which may cause damage or the charger does not work.
5. If there is any overheating of the receiving coil or the emitting plate in the process of using to stop charging, please remove the charged product and try again after cooling down.
6. It is recommended to use this product at 0 ~ 45 °C ambient temperature

Note: These receiving devices need to comply with the WPC QI standard for compatibility

Wireless Charger 1
USB charging cable 1
User Manual 1

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
