# CHARGING YOUR HEADPHONES

Your headphones have a built-in, rechargeable lithium ion battery. To avoid damage, do not attempt to remove the battery. The full performance of the battery is only achieved after a few charging-discharging cycles. Charge the battery fully before first use. To do so, follow the steps below:

1. Connect one end of the included Micro USB charging cable to the charging port on your headphones. Then plug the other end of the charging cable into a USB port on your computer or a suitable power adapter in order to recharge the internal rechargeable battery.

NOTE: The internal battery of your headphones takes approximately two hours to charge when completely drained.

2. When the battery is charging, the LED indicator light will turn red. The LED indicator light will turn blue when the battery is fully charged. Unplug when charging is complete.

NOTE: Overcharging could reduce the life of the battery. A charged battery will lose its capacity if it is not used on a regular basis.
