RE: CONFIDENTIALITY REQUEST FOR FCC ID: 2AOADEM5A

To Whom It May Concern:

This letter serves as an official request for confidentiality under sections § 0.457(d) and § 0.459 of CFR 47. We have requested that the following documents required to be submitted with this application be permanently withheld from public review.

- 1. Block Diagram**
- 2. Schematics**
- 3. Theory of Operation**
- 4. Internal Photos**

These documents contain detailed system and equipment descriptions and related information about the product, which Divigraph (Pty) LTD considers to be proprietary, confidential, and a custom design and otherwise, would not release to the general public. The device is potted and the internal components and circuit boards are not accessible or visible to the customer. The internal components and circuit boards are permanently set in place by the potting material and the only manner to access them is to damage the product and the internal circuit boards. Since this design is a basis from which future technological products will evolve, Divigraph feels that this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give our competitors an unfair advantage in the market.

Please contact me if there is any information you may need.

Sincerely,

Shaun Schulze
Director
Divigraph (Pty) LTD
