■ Wireless Charging Output: 10W (Max.)

■ Wireless Distance: ≤6mm

■ Efficiceny: ≥71%

■ Dimension: 80 x 70 x 58.5 mm

■ Weight: 70g

How to set up the Air Vent Car Mount

- Connect the power cable to the car holder. If needed, connect the extension cable.
- 2. Plug the power supply into the car's cigarette lighter socket.
- A simple push of one gripper arm holds and locks your device in place and charging starts immediately.

Insert a type-c cable for connecting to your vehicle's 12V power outlet

The LED light illuminates continually during wireless charging and flashes to indicate a charging problem or insufficient current to the vent mount.

LED indicator lights:

No light - standby Flashing - connecting

Solid ligh - charging

EASILY MOUNTS ON AIR VENT:

The wireless charger car mount attaches easily to the blades of your AC vent and it's fully adjustable to fit any type of car vents.

180° ROTATION:

QIVENTBK3-T comes with air vent mount and it provides flexible choice of viewing your phone while driving. The 180 degree rotating ball joint on both mounts enables flexible viewing angles while driving.

Standard accessories:

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection

against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- —Increase the separation between the equipment and receiver.
- —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- —Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
