A detailed photograph of a smartphone motherboard, showing various components like the MediaTek processor, memory chips, and camera modules. The board is resting on a blue textured surface.

A close-up photograph of a disassembled smartphone, showing the internal components. On the left is a green SIM card tray with the text "HC 3CL1E" and several oval-shaped slots. In the center is the main logic board, which is populated with various integrated circuits. Notable chips include a large black square chip labeled "5627K KCFQH BD061", a smaller black square chip labeled "6778 PBE1Z BD01P", and a complex multi-chip module labeled "660X 151X". The board also features several gold-plated connectors and circular mounting holes. The entire assembly is resting on a blue, textured surface.
