LED	1 x WIFI / 4 x Socket	
ETC	1 x Reset Button / 1 x Power Switch	
Rated Voltage/Current	250V / 10A	
Recommended Usage	2,200W (By socket 2,200VA)	
SMPS	Input : 110-220 VAC Output : 5V / 1.5A	
Product Size	304 X 60 X 40 (mm)	

Quality assurance

- We guarantee the product with defects during normal use from the date of first purchase for 1 year.
- Changes to the owner of the product may limit its warranty.
- Damage caused by natural disasters or customer negligence is not guaranteed.
- We do not guarantee any disassembly or modification of the product.

Guidelines for product usage

- Use wall outlets or dedicated outlets for air conditioners / heaters / steam appliances / dedicated kerosene
- Do not use high capacity such as air conditioner, electric heater and so on. (Cause of overload)
- Please use less than 10A (2,000W) where the overload cut-off / earth leakage breaker is installed.
- This product is for indoor use only. Never use it in a place with high temperature and high humidity.
- Do not loosen wires, use them, and do not damage (press, scratch, peel, etc.).
- Never plug anything other than a plug (chopsticks, nails, screwdrivers, etc.) into the outlet opening.
- Do not disassemble or modify the product.
- Replace plugs that are fully plugged and loose.
- Because the radio equipment is capable of radio interference, services related to personal safety can not be performed.
- This equipment is intended for home use (Class B) and is suitable for home use as an electromagnetic compatibility device and can be used in all areas.

Model	User manual
Class B devices (Home Broadcasting Communication Equipment)	This equipment is intended for home use (Class B) electromagnetic compatibility equipment, and can be used in all areas.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- o Reorient or relocate the receiving antenna.
- o Increase the separation between the equipment and receiver.
- o Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- o Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void our authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference, and (2) this device must accept any interference
- 2) Received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
