Solder Board-Component View 15	 A photograph of a small green printed circuit board (PCB) component, identified as View 15. The component is positioned on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters, with the vertical scale ranging from 0 to 100 mm and the horizontal scale from 0 to 100 mm. The component features a gold-colored rectangular pad at one end, a series of small silver solder points, and a small white circular mark. The text "WALTEK" is visible on the green PCB.
Solder Board-Component View 16	 A photograph of the same green PCB component, identified as View 16. It is placed on the same blue textured surface next to the same black L-shaped ruler. In this view, the component's profile is different, showing a different arrangement of solder points and a small white circular mark. The text "WALTEK" is also visible on the PCB.

Solder Board-Component View 17	 A microscopic view of a small green printed circuit board (PCB) component. The component features a gold-plated edge connector on the right side. It is labeled with 'V1.0' and '2014-1-19'. A black L-shaped millimeter ruler is placed next to the component for scale, showing measurements in millimeters.
Solder Board-Component View 18	 A microscopic view of a square component, likely a solder joint or a small component, with a central circular feature. A black L-shaped millimeter ruler is placed next to it for scale, showing measurements in millimeters.

Solder Board-Component View 19	 A photograph showing a small electronic component, likely a power module, mounted on a black printed circuit board (PCB). The component features a large, circular, gold-colored heat sink and several surface-mounted components, including a red electrolytic capacitor and a small integrated circuit. The PCB is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. A black cable is connected to the component.
Solder Board-Component View 20	 A photograph showing a small electronic component, likely a power module, mounted on a black printed circuit board (PCB). The component is a rectangular board with several surface-mounted components, including a red electrolytic capacitor and a small integrated circuit. The PCB is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
