Solder Board-Component View 7	 A photograph of a small, black, rectangular electronic component with several soldered connections. The component is positioned vertically next to a ruler with millimeter markings. The ruler shows measurements from 0 to 50 mm. The component has some markings, including "0-0007-00-2" and "2563".
Solder Board-Component View 8	 A photograph of a small, green, rectangular electronic component with a gold-colored solder pad. The component is positioned horizontally next to a ruler with millimeter markings. The ruler shows measurements from 0 to 50 mm. The component has markings including "THI-SW-11-GNSS V01" and "2024-7-5 V 01".

Solder Board-Component View 9	 A photograph of a small green printed circuit board (PCB) component, identified as a solder board component in View 9. The component is rectangular and populated with various electronic components, including a large black integrated circuit (IC) in the center, a silver circular component (likely a capacitor or inductor) on the left, and several smaller surface-mount components. The PCB is placed on a blue background next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 40 mm marks. The text "HIT-SM-T1-GNSS V01" and "2024-7-5 V 01" is visible on the bottom of the PCB.
Solder Board-Component View 10	 A photograph of the same solder board component from View 10, showing the underside. The component is a square-shaped package with a gold-colored surface and a central circular solder pad. It is placed on a blue background next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 40 mm marks.

Solder Board-Component View 11	 A photograph of a small green printed circuit board (PCB) component, identified as View 11. The component is rectangular with a complex arrangement of surface-mounted components, including a large central chip, several smaller chips, and numerous resistors. A coiled copper wire is attached to the top of the board. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 20 mm.
Solder Board-Component View 12	 A photograph of the same green PCB component, identified as View 12. This view shows the component from a slightly different angle, highlighting the underside of the central chip and the arrangement of components on the opposite side. The coiled copper wire remains attached to the top. The component is again placed on a blue surface next to a black ruler with white markings, showing its dimensions.
