Solder Board-Component View 6	 A photograph of a small, dark, rectangular electronic component with several soldered connections. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 50 mm marks. The component has some text printed on it, including "10-00047-001-2" and "E3522".
Solder Board-Component View 7	 A photograph of a small, green, rectangular electronic component with a gold-colored solder pad and a small connector. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 50 mm marks. The component has some text printed on it, including "H1-SM-11-GNSS VOL" and "2024-7-5 V 01".

Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component, identified as View 8. The component is rectangular and populated with various electronic components, including a large black integrated circuit (IC) in the center, a silver circular component (possibly a capacitor or inductor) on the left, and several smaller surface-mount components. It is positioned next to a black ruler with white markings, showing a scale from 0 to 40 mm. The background is a blue textured surface.
Solder Board-Component View 9	 A photograph of a small, square, light-colored component, identified as View 9. The component has a central circular feature and is surrounded by a brownish, irregular border. It is positioned next to a black ruler with white markings, showing a scale from 0 to 50 mm. The background is a blue textured surface.

Solder Board-Component View 10	 A photograph of a small green printed circuit board (PCB) component, identified as 'PICO CLC B5_002 B5_002', resting on a blue surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately from the 10 mm mark to the 60 mm mark. The component features various electronic components, including a central integrated circuit, several resistors, and a coiled spring-like structure on the right side.
Solder Board-Component View 11	 A photograph of the same green PCB component, identified as 'PICO CLC A5_002 A5_002', resting on a blue surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately from the 10 mm mark to the 60 mm mark. The component features various electronic components, including a central integrated circuit, several resistors, and a coiled spring-like structure on the right side.
